New developments such as the growth of self-publishing and print-on-demand, and initiatives from major players such as Amazon and Google, mean that the printed book is in the middle of great changes. This important new book presents a unique body of research into the economics of the digital society. It questions how modern economies have been transformed as a result of digital goods and markets and explores the policy implications and challenges of this revolution. Luc Soete and Bas ter Weel have assembled leading economists and social scientists to provide an invaluable insight into the influence of the digital society in the core fields of economics. They offer a comprehensive overview of the changes that information and communication technologies (ICTs) have brought about in our analysis and understanding of society, focusing particularly upon welfare, economics, networks, the diffusion of new businesses and new forms of entrepreneurship, the auctioning of licences, the much-debated role of intellectual property rights and the emergence of free software in the open source movement. *THE OFFICE*, 1991. **Infosystems**, 1986. **Real Time Digital**
