Krepinevich,2023-03-21 How the character of war is changing and how militaries can successfully adapt to meet the challenge This book by military strategist Andrew F Krepinevich Jr is the definitive take on the race for military dominance in the twenty first century It shows how militaries that successfully pursue disruptive innovation can gain a major advantage over their rivals while those that fail to do so risk exposing their countries to great danger The Precision Warfare Revolution introduced by the U S military in the First Gulf War found the United States enjoying a near monopoly in this form of warfare for several decades But now other powers have these capabilities The U S military also confronts an emerging military revolution driven by advances across a wide range of technologies from artificial intelligence and synthetic biology to quantum computing and additive manufacturing To stay competitive the U S military must pursue disruptive innovation in a race with other militaries to exploit war s changing character Clues exist as to the winner s identity They are revealed by militaries that went beyond the bounds of mere innovation to overturn the existing forms of warfare changing the course of history and the fate of nations Through exploring their experiences Krepinevich shows how the U S military can win the race to identify and exploit the next big thing in warfare      **Air Leadership** Wayne Thompson,1986      [Destined for Glory](#) Thomas Wildenberg,2013-04-08 On 4 June 1942 three squadrons of U S Navy Dauntless dive bombers destroyed Japan s carrier force at Midway and changed the course of the Pacific war As Wildenberg demonstrates in this book the key ingredient to the Navy s success was the planning and training devoted to the tactic of dive bombing Examining how political economic technical and operational factors influenced the development of carrier airpower between 1925 and 1942 he shows why dive bombing became the Navy s weapon of choice He also pays tribute to the select group of naval aviators who drove the evolution of carrier tactics Although many books have been written about the Battle of Midway this is the first to focus on how the Navy came to develop the one aerial weapon that proved to be the decisive instrument of victory      **America's First Aircraft Carrier** David F Winkler,2024-02-15 America s First Aircraft Carrier tells the remarkable story of the USS Langley The narrative provides an in depth discussion of the ship s origins as the collier USS Jupiter which was built with a first of propulsion system that has been adapted for use in present day Ford class carriers Author David F Winkler considers the post World War I debate for procuring carriers the decision to convert Jupiter and the identification of constructor Clayton Simmers as the father of the American aircraft carrier The evolution of the Langley as an experimental ship was tied to the introduction of new doctrine for the United States Promoting an independent naval air arm against Brig Gen Billy Mitchell s vision of an independent air force the U S Navy saw Langley as an operational aircraft carrier that would change the way the Navy fought wars at sea While the story of Langley is that of the origins of naval air combat it is also a record of the vessel s service in World War II until the ship s final posting to the Asiatic Fleet where she

met her demise on February 27 1942 off the southern coast of Java Many of the U S Navy s pioneering naval aviators are closely associated with this ship including Kenneth Whiting John H Towers Godfrey DeCourcelles Chevalier Virgil C Griffith Mel Pride Patrick N L Bellinger Joseph M Reeves Gerald Bogan Aubrey Fitch Felix Stump Ernest J King Warren G Child Dan Gallery and Frank D Wagner A number of these individuals would go on to play critical roles during World War II Langley s story is their story Aircraft carriers remain the centerpiece of American sea power projection America s First Aircraft Carrier provides the context on how CV 1 the Covered Wagon and carrier development and utilization came to be **Air**
