Washington's Monument John Steele Gordon,2016-02-02 The colorful story behind one of America s greatest monuments and of the ancient obelisks of Egypt now scattered around the world Conceived soon after the American Revolution ended the great monument to George Washington was not finally completed until almost a century later the great obelisk was finished in 1884 and remains the tallest stone structure in the world at 555 feet The story behind its construction is a largely untold and intriguing piece of American history which acclaimed historian John Steele Gordon relates with verve connecting it to the colorful saga of the ancient obelisks of Egypt Nobody knows how many obelisks were crafted in ancient Egypt or even exactly how they were created and erected since they are made out of hard granite and few known tools of the time were strong enough to work granite Generally placed in pairs at the entrances to temples they have in modern times been ingeniously transported around the world to Istanbul Paris London New York and many other locations Their stories illuminate that of the Washington Monument once again open to the public following earthquake damage and offer a new appreciation for perhaps the most iconic memorial in the country **The Washington Monument** Julia Schaffer,2009-10 Shortly after George Washington s death in 1799 Congress recognized the need for a presidential monument in his honor However progress did not begin on the structure until 1832 The Washington Monument traces the construction of the monument from its design by Robert Mills to halts in construction due to lack of funds and the Civil War to its dedication in 1885 Today the world s largest obelisk stands as an eternal reminder of the accomplishments of the nation s first president **The Washington**

The Most Famous Monuments of Washington D.c. Charles River Editors,2015-02-02 Includes pictures Includes accounts of the origins and construction of the monuments written by people who worked on them Includes bibliographies for further reading Includes a table of contents People have always loved symbols and monuments and monumental architecture has always been as much symbolic as functional The pyramids of ancient Egypt were artificial mountains expressing the link of the pharaoh to the gods and mountains have always been associated with the divine in the human imagination The Colossus of Rhodes the Roman Senate House and Temple of Capitoline Jove the Grand Teocalli and Tzompantli or skull rack of the Aztec capital Tenochtitlan the Forbidden City of Peking the Parisian Arc de Triomphe de l Etoile and the Brandenburg Gate of Berlin all provide or provided material focuses for national ideals beliefs and culture There are countless ways that Washington remembered as first in war first in peace and first in the hearts of his countrymen has been commemorated across America but the most famous is the Washington Monument Congress had actually called for establishing a monument to Washington as far back as 1783 but it would not be until the 1830s that work on the world's tallest obelisk began in earnest In fact while the Washington Monument is taken as a given today and it was designed to be unparalleled in the world and commensurate with the gratitude liberality and patriotism of the people by whom it is to be erected there were several issues that nearly prevented it from being a reality including political arguments costs and lack of progress Though it may be hard to believe the Washington Monument was not dedicated until the 1880s nearly half a century after it was first proposed By the time it was finished however it was clear that the wait was worth it Soaring nearly 550 feet into the air the Washington Monument was the tallest structure in the world upon its completion and it immediately began drawing hundreds of thousands of visitors who could either climb stairs to the top or ride an elevator The monument has remained one of the most instantly recognizable structures in the world ever since There are countless ways that the Great Emancipator has been commemorated across America but the most famous is the Lincoln Memorial which would not be completed until well over half a century after his death Lincoln had called upon Americans to bind up their wounds in his Second Inaugural Address and in many ways the memorial was the result of the country's sectional reconciliation making it all the more fitting In the

end the time it took to complete the memorial was worth the wait as the finished product included a masterfully sculpted statue of Lincoln sitting in the middle of a giant structure that immediately brings to mind an Ancient Greek or Roman temple. Situated across the National Mall from the Washington Monument, the Lincoln Memorial is perfectly positioned and thanks to Lincoln's presidency and freeing of the slaves, the memorial has become a poignant symbol for protests, especially at the height of the Civil Rights Movement when Martin Luther King Jr gave his I Have a Dream speech. Jefferson's life and career are still sometimes fiercely debated today. As a result, it's only fitting that the Jefferson Memorial would also be majestic and controversial. A tranquilly elegant neoclassical building fronted by slender pillars and topped by a gently domed roof, the Jefferson Memorial stands among other American monuments near the shores of the Tidal Basin in Washington D C. Housing a five-ton, nineteen-foot tall statue of Thomas Jefferson, the building looks as though it could be as long established as the White House itself, but it is actually much newer. Facing opposition on several fronts when it was first proposed, including outcries from those who objected to its neoclassical style.
