Symposium On Complex Analysis:

The Madison Symposium on Complex Analysis Edgar Lee Stout, 1992 This volume contains the proceedings of a Symposium on Complex Analysis held at the University of Wisconsin at Madison in June 1991 on the occasion of the retirement of Walter Rudin During the week of the conference a group of about two hundred mathematicians from many nations gathered to discuss recent developments in complex analysis and to celebrate Rudin's long and productive career Among the main subjects covered are applications of complex analysis to operator theory polynomial convexity holomorphic mappings boundary behaviour of holomorphic functions function theory on the unit disk and ball and some aspects of the theory of partial differential equations related to complex analysis Containing papers by some of the world's leading experts in these subjects this book reports on current directions in complex analysis and presents an excellent mixture of the analytic and geometric aspects of the theory

Proceedings of the Symposium on Complex Analysis Canterbury 1973 J. Clunie, 1974-08-08 An international conference on complex analysis was held in Canterbury in July 1973 Some of the world's most prominent complex analysts attended and some outstanding open problems had their first solutions announced there These are reflected in this set of Proceedings Almost all of the contributions are abstracts of talks given at the symposium The final part of this volume is a section on research problems contributed by members of the conference and a report on a previous collection of problems edited by Professor W K Hayman after an earlier conference in 1964 This book is essential reading for research workers and graduate students interested in complex analysis

The Madison Symposium on Complex Analysis, 1992 Proceedings of the Conference on Complex Analysis A. Aeppli, E. Calabi, H. Röhrl, 2012-12-06 This volume contains the articles contributed to the Minnesota Conference on Complex Analysis COCA The Conference was held March 16-21, 1964 at the University of Minnesota under the sponsorship of the U S Air Force Office of Scientific Research with thirty one invited participants attending Of these nineteen presented their papers in person in the form of one hour lectures In addition this volume contains papers contributed by other attending participants as well as by participants who after having planned to attend were unable to do so The list of participants as well as the contributions to these Proceedings clearly do not represent a complete coverage of the activities in all fields of complex analysis It is hoped however that these limitations stemming from the partly deliberate selections will allow a fairly comprehensive account of the current research in some of those areas of complex analysis that in the editors' belief have rapidly developed during the past decade and may remain as active in the foreseeable future as they are at the present time In conclusion the editors wish to thank first of all the participants and contributors to these Proceedings for their enthusiastic cooperation and encouragement Our thanks are due also to the University of Minnesota for offering the physical facilities for the Conference and to Springer Verlag for publishing these proceedings
