## **The Social Future:**

**The Social Future** Rudolf Steiner,1935      **Curriculum, Personal Narrative and the Social Future** Ivor F.

Goodson,2014-06-05 Recent writing on education and social change and a growing number of new governmental initiatives across Western societies have proceeded in denial or ignorance of the personal missions and biographical trajectories of key public sector personnel This book stems from an underpinning belief that we have to understand the personal biographical if we are to understand the fate of social and political initiatives In education a pattern has emerged in many countries around the world Each new government enshrines targets and tests to ensure that teachers at the frontline delivery are more accountable Whilst this often provides evidence of symbolic action to the electorate or professional audiences the evidence at the level of service delivery is often far less impressive Targets tests and tables may win wide support from the public but there are often negligible or even contradictory effects at the point of delivery enforced by the ignorance or denial of personal missions and biographical mandates This book locates most of its analysis and discussion at the point of culture clash between centralised dictates and individual and collective life missions Whilst the early part of the book considers a range of issues related to school curriculum the focus on the biographical and life narrative becomes increasingly important as the analysis proceeds Curriculum Personal Narrative and the Social Future will be of key interest to practising teachers educational researchers and students on teacher training courses postgraduate courses and doctoral courses      **The Social**

**Studies Curriculum** E. Wayne Ross,2012-02-01 The third edition of The Social Studies Curriculum thoroughly updates the definitive overview of the primary issues teachers face when creating learning experiences for students in social studies By connecting the diverse elements of the social studies curriculum history education civic global and social issues the book offers a unique and critical perspective that separates it from other texts in the field This edition includes new work on race gender sexuality critical multiculturalism visual culture moral deliberation digital technologies teaching democracy and the future of social studies education In an era marked by efforts to standardize curriculum and teaching this book challenges the status quo by arguing that social studies curriculum and teaching should be about uncovering elements that are taken for granted in our everyday experiences and making them the target of inquiry      Routledge Handbook of Social Futures Carlos

López Galviz,Emily Spiers,2021-11-22 Featuring chapters from an international range of leading and emerging scholars this Handbook provides a collection of cutting edge interdisciplinary research that sheds new light on contemporary futures studies Engaging with key defining questions of the early twenty first century such as climate change big data AI the future of economics education mental health cities and more the Handbook provides a review and synthesis of futures scholarship highlighting the role that societies can and should play in their making While the various chapters demonstrate how futures emerge and take shape in particular places at particular times the distinctive insight provided by the volume overall is that futures thinking today must be social and contextual By presenting a range of futures work from contexts around the globe

the Handbook contextualizes techniques forecasting backcasting scenario planning collaboration and co production to ask how different dimensions of the social are created and circulated in the process Through its thirty chapters the volume explores and interrogates narratives anticipations enactments ecologies collaborations prospections and so on to highlight which versions of the social are legitimized and which are encouraged and foreclosed This Handbook opens an important conversation about the centrality of the social in futures thinking By bringing arts humanities and social sciences scholars and practitioners into conversation with biologists environmental climate and computer scientists this volume seeks to encourage new pathways across between and within multiple disciplines to interrogate the futures we need and want The social must be our starting point if we are to steer our planet in a direction that supports good lives for the many everywhere
