The Distanceinbetween:

Distances Between United States Ports, 1993 *Shortening the Distance between Government and Public in China II*
Liu Xiaoyan, 2020-12-15 Distance in its traditional sense connotes estrangement and division But in the context of modern political studies it means a controllable resource which can be manipulated to change the relationship between the government and the public Drawing on this concept from western political science the author explores the law and mechanisms of China's political communication In this volume the author introduces the empirical investigation of the distance between government and the public in China First it discusses how the use of online social media such as Weibo can be used strategically to mediate the distance of offline communication Then it points out that social media can also lead to unlimited expression of general will to which governments should pay attention An empirical study on how rural residents of five provinces in China obtain political information is used to illustrate the point Students and scholars who are interested in political science and political communication especially Chinese politics would find this title a useful reference
