Handbook of Molecular-Genetic Techniques for Brain and Behavior Research Wim E. Crusio,R.T. Gerlai,1999-10-18 The book gives a broad overview of recombinant DNA techniques for the behavioral neuroscientist with illustrative examples of applications Species covered include rodents mainly mice Drosophila

melanogaster Caenorhabditis elegans and Danio rerio Experimental techniques required to characterize the behavioral phenotypes of mutant animals is provided Several aspects of novel molecular genetic techniques are overviewed and possible research strategies are explained The sections of the book start with general descriptions of techniques followed by illustrative examples It is divided into six sections Section 1 bioinformatics and genomics research Section 2 top down strategies where the researcher starts with the phenotype and then analyzes the associated genes bottom up strategies where the physiological chain leading to a phenotype is analyzed starting from the gene product Section 3 transgenic approaches in rodents including overexpressing foreign genes and gene targeting systemic manipulation approaches directly targeting the central nervous system and methods used with invertebrates Section 4 methods used to evaluate relevant behavioral phenotypes including learning and aggression Section 5 examples on molecular brain research in man Section 6 ethical aspects of research in this field

*Biotechnology in Animal Husbandry* R. Renaville,A. Burny,2006-04-11 Animal biotechnology is a broad umbrella encompassing the polarities of fundamental and applied research including molecular modelling molecular and quantitative genetics gene manipulation development of diagnostics and vaccines and manipulation of tissue or digestion metabolism by growth promoters Although animal biotechnology in the broadest sense is not new what is new is the level of complexity and precision involved in scientists current ability to manipulate living organisms This new book sets out to show that the important ideas in animal biotechnology are exciting and relevant to everyday experience It represents an important update of the literature for research workers lecturers and advisers in animal science but is also a core text for advanced undergraduate courses in animal science and biotechnology It will be an essential acquisition for librarians in agriculture and veterinary science
