Treatment of Petroleum Refinery, Petrochemical, and Combined Industrial-municipal Wastewaters with Activated Carbon John E. Matthews, 1978 INDUSTRIAL WASTE WATER TREATMENT A. D. PATWARDHAN, 2008-05-07 All industrial production processes generate waste waters which can pollute water bodies into which they are discharged without adequate treatment It is therefore essential to treat such wastes and eliminate their harmful effects on the environment This book discusses sources characteristics and treatment of waste waters produced in industries such as textiles dairy tanneries pulp and paper fertilizer pesticide organic and inorganic chemicals engineering and fermentation Many flow diagrams have been included to illustrate industrial processes and to indicate the sources of waste water in such processes After describing treatment for individual factories the author discusses the more advanced and economical common effluent plants The text uses simple and straightforward language and makes the presentation attractive This book should prove extremely useful to undergraduate students of civil and chemical engineering and postgraduate students of environmental science and engineering Industrial design consultants will also find the book very handy To the Greens it may offer some of the solutions to their concerns
