Water Science And Issues:

Water, 2003 Integrates key concepts current issues traditional and emerging research and major legislation in three subject areas fresh water marine waters and policy and management These topics are complemented by historical overviews biographical sketches and career information Includes color photographs and illustrations sidebars and a glossary Broadly applicable for general readers as well as those wanting a firm academic foundation **Water Science and Issues D. Corbett, 2003-04**

Confronting the Nation's Water Problems National Research Council, Division on Earth and Life Studies, Water Science and Technology Board, Committee on Assessment of Water Resources Research, 2004-10-14 In order to confront the increasingly severe water problems faced by all parts of the country the United States needs to make a new commitment to research on water resources A new mechanism is needed to coordinate water research currently fragmented among nearly 20 federal agencies Given the competition for water among farmers communities aquatic ecosystems and other users as well as emerging challenges such as climate change and the threat of waterborne diseases *Confronting the Nation's Water Problems* concludes that an additional 70 million in federal funding should go annually to water research Funding should go specifically to the areas of water demand and use water supply augmentation and other institutional research topics The book notes that overall federal funding for water research has been stagnant in real terms for the past 30 years and that the portion dedicated to research on water use and social science topics has declined considerably **Water Science and Issues-Blank D. Water, 2003 **Nonindigenous species an emerging issue for the EPA. , 2001** **Course-Based Undergraduate Research** Nancy H. Hensel, 2023-07-03 Co published with the Council on Undergraduate Research Undergraduate research has long been recognized as a high impact practice HIP but has unfortunately been offered only to juniors and seniors and to very few of them often in summer programs This book shows how to engage students in authentic research experiences built into the design of courses in the first two years thus making the experience available to a much greater number of students Research that is embedded in a course especially general education courses addresses the issue of how to expand undergraduate research to all students Research has shown that students who have early experiences in undergraduate research are more likely to pursue further research prior to and after graduation This is also an issue of social justice because it makes the benefits of undergraduate research available to students who must work during the academic year and in the summer It is widely accepted that the skills developed through undergraduate research help prepare students for their future careers The book addresses all aspects of the topic including What are appropriate expectations for research in the first two years How to design appropriate course based research for first and second year students How to mentor a class rather than individual students How students can disseminate the results of their research Possible citizen science projects

appropriate for the first and second years Providing additional resources available to support course based research in the first two years Designed for faculty at four year and two year colleges and including examples from the sciences the social sciences and the humanities the strategies and methods described can be adapted to disciplines not specifically mentioned in the book Many faculty are hesitant to engage first and second year students in undergraduate research because they worry students don t know enough to conduct authentic research in their discipline because they worry about the time it will take to develop activities for these students and because they wonder how they can mentor a whole class of students doing research The authors have successfully dealt with these issues and provide examples of how it s done
