Tagalog Structures Teresita V. Ramos,1975 **Phrase Structure and Grammatical Relations in Tagalog** Paul Kroeger,1993-07-30 Over the last twenty years or so most of the work on the syntax of Philippine languages has been focused on the question of whether or not these languages can be said to have grammatical subjects and if so which argument of a basic transitive clause should be analysed as being the subject Paul Kroeger's contribution to this debate asserts that grammatical relations such as subject and object are syntactic notions and must be identified on the basis of syntactic properties rather than by semantic roles or discourse functions A large number of syntactic processes in Tagalog uniquely select the argument which bears the nominative case On the other hand the data which have been used in the debate to assert the ambiguity of subjecthood are best analysed in terms of semantic rather than syntactic constraints Together these facts support an analysis that takes the nominative argument as the subject Kroeger examines the history of the subjecthood debate and uses data from Tagalog to test the theories that have been put forth His conclusions entail consequences for certain linguistic concepts and theories and lead Kroeger to assert that grammatical relations are not defined in terms of surface phrase structure configurations contrary to the assumptions of many approaches to syntax including the Government Binding theory Paul Kroeger is presently doing fieldwork in Austronesian languages and teaching linguistics to fieldworkers from around the world

Ay-Inversion in Tagalog Patrick Nuhn,2021-10-11 Tagalog an Austronesian language is widely spoken and understood throughout the Philippine archipelago where it served as the basis

for the national language Filipino The language is often cited for its many unusual linguistic properties Drawing on both spoken fieldwork data and written data from novels this study investigates several phenomena at Tagalog s interface of information structure and morphosyntax Aside from the default predicate initial word order the Tagalog language has several information structurally marked constructions that allow other constituents to appear in the sentence initial position One of these constructions is ay inversion Although it is often labeled a topic marking construction it is actually far more versatile This book aims to explore some of its many facets The investigation of ay inversion begins with a survey of its various uses that appear in the data including some that have to date received very little if any attention in the literature such as reversed ang inversion which combines two of the language s inversion constructions Selected observations are then modeled in Role and Reference Grammar and their implications for Tagalog syntax are explored Finally the role of ay inversion in anaphora resolution is investigated and selected processes are modeled in a frame based account
