*Cubix* , 2001

**The New Breed** Kate Darling, 2021-04-20 For readers of *The Second Machine Age* or *The Soul of an Octopus* a bold exciting exploration of how building diverse kinds of relationships with robots inspired by how we interact with animals could be the key to making our future with robot technology work There has been a lot of ink devoted to discussions of how robots will replace us and take our jobs But MIT Media Lab researcher and technology policy expert Kate Darling argues just the opposite suggesting that treating robots with a bit of humanity more like the way we treat animals will actually serve us better From a social legal and ethical perspective she shows that our current ways of thinking don t leave room for the robot technology that is soon to become part of our everyday routines Robots are likely to supplement rather than replace our own skills and relationships So if we consider our history of incorporating animals into our work transportation military and even families we actually have a solid basis for how to contend with this future A deeply original analysis of our technological future and the ethical dilemmas that await us *The New Breed* explains how the treatment of machines can reveal a new understanding of our own history our own systems and how we relate not just to nonhumans but also to one another

*Media Law Through Science Fiction* Daxton R. Stewart, 2019-08-20 Attorney and legal scholar Daxton Stewart examines the intersection of media law and science fiction exploring the past present and future of communication technology and policy debates Science fiction offers a vast array of possibilities anticipating future communication technologies and their implications on human affairs In this book Stewart looks at potential legal challenges presented by plausible communication technologies that may arise 20 or 50 or 100 years from today Performing what he calls speculative legal research Stewart identifies the kinds of topics we should be talking about relating to speech privacy surveillance and more and considers the debates that would be likely to arise if such technologies become a reality Featuring interviews with prominent science fiction authors and legal scholars and a foreword by Malka Older this book considers the speculative solutions of science fiction and their implications in law and policy scholarship Chapters feature specific literary examples to examine how cultural awareness and policy creation are informed by fictional technology future societies and legal disputes Looking forward beyond traditional legal research and scholarship to the possible and even very likely future of communication technology this fascinating work of speculative legal research will give students and scholars of media law science fiction and technology much to discuss and debate
