Structuration Theory:

The Constitution of Society Anthony Giddens, 2013-06-28 Anthony Giddens has been in the forefront of developments in social theory for the past decade. In *The Constitution of Society* he outlines the distinctive position he has evolved during that period and offers a full statement of a major new perspective in social thought: a synthesis and elaboration of ideas touched on in previous works but described here for the first time in an integrated and comprehensive form. A particular feature is Giddens's concern to connect abstract problems of theory to an interpretation of the nature of empirical method in the social sciences. In presenting his own ideas Giddens mounts a critical attack on some of the more orthodox sociological views. *The Constitution of Society* is an invaluable reference book for all those concerned with the basic issues in contemporary social theory.

Structuration Theory Rob Stones, 2017-03-16 This important text argues for a strong notion of structuration theory in contrast to the seminal but more abstract and relatively underdeveloped project represented by Anthony Giddens's writings. Emphasis on the duality of structure is placed at the centre of the tradition. It is argued that the distinctive power of structuration theory lies in its potential to critically investigate a specific range of in situ questions. *Structuration Theory* produces a synthesis that draws on Giddens's work on other versions of the structuration problematic and on key empirical uses of the approach. The final chapters make use of extended case examples to illustrate the critical power of strong structuration.

The Handbook of Group Communication Theory and Research Lawrence R. Frey, Dennis Gouran, Marshall Scott Poole, 1999-07-08 *The Handbook of Group Communication Theory and Research* establishes a central resource for the field, documenting and synthesizing the work done in group communication's 50-year history. With contributions from the most experienced and respected scholars in the field, the editors Lawrence R. Frey, Dennis S. Gouran, and Marshall Scott Poole present an overview of group communication study and examine a variety of theoretical positions and methodological practices. The volume is divided into six broad areas of communication scholarship: Foundations of group communication theory and research; Individuals and group communication; Task and relational group communication; Group communication processes; Group communication facilitation; Group communication contexts and applications. The sections serve as a crossroads where various paths pursued in each area meet, summarize, and suggest new maps and roads that need to be followed in the future. Offering a comprehensive history of group communication theory and research and establishing new conceptual perspectives and research agendas for future group communication scholars, this important resource will be an unrivalled tool for scholars, researchers, educators, practitioners, and students alike.

Giddens' Theory of Structuration Christopher Bryant, David Jary, 2014-06-03 Anthony Giddens is one of the most respected and influential social theorists at work today. This wide-ranging and stimulating volume, first published in 1991, provides an authoritative and penetrating critical assessment of social theory. It will be of use to all students of sociology and social theory.

Cambridge Handbook of Strategy as Practice Damon Golsorkhi, Linda Rouleau, David Seidl, Eero Vaara, 2010-08-26 *The Cambridge Handbook of*

Strategy as Practice provides a comprehensive overview of an emerging and growing stream of research in strategic management. An international team of scholars has been assembled to produce a systematic introduction to the various epistemological, methodological, and theoretical aspects of the strategy as practice approach. This perspective explores and explains the contribution that strategizing makes to daily operations at all levels of an organization. Moving away from a disembodied and asocial study of firm assets, technologies, and practices, the strategy as practice approach breaks down many of the traditional paradigmatic boundaries in strategy to investigate who the strategists are, what strategists do, how they do it, and what the consequences or outcomes of their actions are. Including a number of detailed empirical studies, the handbook will be an essential guide for future research in this vibrant field.

Applying Communication Theory for Professional Life Marianne Dainton, Elaine D. Zelley, 2005. A collection of essays that explores the emotional and spiritual experiences common to those who knit. Its stories chronicle how knitting can be a spiritual, meditative experience and how one can learn patience, creativity, discipline, and diligence from knitting. Intertwined with the essays are knitting patterns with easy how-to steps and photographs.

Anthony Giddens Christopher G. A. Bryant, David Jary, 1997. Anthony Giddens has made original contributions to the fields of social theory, political sociology, the sociology of stratifications, and suicide. This set includes carefully selected secondary articles which bring out the scope of his work.

Structuration Theory Ira J. Cohen, 1989. *Social Theory of Modern Societies* David Held, John Brookshire Thompson, John B. Thompson, 1989-12-07. This book offers a comprehensive appraisal of the work of Anthony Giddens, who is known worldwide as one of the leading figures in social theory and the social sciences. During the last decade, Giddens has published a series of substantial volumes which have defined a distinctive and original theoretical approach. The twin focal points of his approach are the theory of structuration and the analysis of modernity. Giddens's writings on these and related themes are widely recognized as among the most important contributions to theoretical debate in the social sciences. *Social Theory of Modern Societies* is the first volume to provide a systematic and critical assessment of Giddens's contributions. The volume includes eleven critical essays, all of which were specially commissioned for this volume by authors who are well known in their own fields: Zygmunt Bauman, Richard J. Bernstein, Derek Gregory, Nicky Gregson, David Held, Bob Jessop, Linda Murgatroyd, Peter Saunders, Martin Shaw, John B. Thompson, and Erik Olin Wright. In a long concluding chapter, Anthony Giddens responds to the criticisms raised by these and other authors, clarifying and elaborating his current views. The result is a unique and engaging book which gives both a critical evaluation of Giddens's work and a guide to some of the theoretical issues which are at the forefront of the social sciences today. It will be of interest to students and academics in sociology, politics, and geography, and to students in the social sciences and humanities generally.

The Structure of Social Theory Anthony King, 2004. Over the last three decades, social theory has become an increasingly important subdiscipline within sociology. Social theory has attempted to elucidate the philosophical basis of sociology by defining the nature of social reality. According to social theory, society

consists of objective institutions structure on the one hand and individuals agency on the other it promotes human social relations insisting that in every instance social reality consists of these relations

Social Theory Today Anthony Giddens, 1987 Social theory has undergone dramatic changes over the past fifteen years The aim of this book is to provide a comprehensive survey of those changes and an authoritative statement on current trends of development in social thought The contents of the book range in a systematic way across the major traditions of social theory prominent today Among the topics covered are the relationships between modern social theory and the classics of the late eighteenth and nineteenth centuries the connections between social theory and mathematical social science and the logical status of generalizations in the social sciences Traditions of thought discussed include behaviourism symbolic interactionism Parsonian theory analytical theory structuralism and post structuralism ethnomethodology structuration theory world systems theory Marxism and critical theory
