Structures How Things Work:

How Things Work: Inside Out Tamara J. Resler, 2017 Explores the inner mechanisms of such items as fitness trackers plasma balls springs and green buildings exploring how the different elements of each work together **Social Structure** Jonathan Eastwood, 2024-12-03 Social structure is arguably the central concept of sociology and in recent years a much wider public has taken up with fresh vigor the sociological idea that persistent inequalities are rooted in social structures Yet there seem to be as many definitions of the term as there are sociologists and we often struggle to articulate accessible yet precise accounts of structures that can guide empirical research and other kinds of action Jonathan Eastwood offers a set of pragmatic strategies for thinking about social structures emphasizing ways in which we can approach them as complex lacings of relationships representations and rules He then teases out a variety of implications of these strategies for qualitative and quantitative research the analysis of social problems and the implementation of social policies Written for advanced undergraduate and graduate students as well as fellow scholars this insightful book contributes to our understanding of this fundamental and dynamic ingredient of social life Systems, Relations, and the Structures of International Societies Jack Donnelly, 2023-11-02 Argues that systems approaches are necessary in order to identify and understand important features of the world *Creativity* Stan Lai, 2025-11-04 Asia's legendary playwright director Stan Lai has written one of the unique works of our time explaining that the mysterious act of creativity is actually a traceable function of mind and there is a path to learn creativity through unlearning many of our habits picked up in life His special map as well as tailor made exercises lays out an awe inspiring yet practical guide from a lifetime of creative work revered in Asia by artists and business leaders alike Through his extensive experience the greatest living Asian playwright shows us how to cultivate a creative app that works within us Matthieu Ricard says Stan Lai teaches us how to see and how to do Praised by Jack Ma Ang Lee and other luminaries this book is a rewrite by the author of his book that is the most prominent work on creativity in China having sold over 700 000 copies Robert Wilson calls the work foundational support for arts and culture Stan Lai is uniquely qualified to write on creativity because he not only has four decades of creative experience widely acclaimed as the greatest playwright in the Chinese language but is also a dedicated educator Shannon Jackson calls the work A must read from an internationally renowned artist Can creativity be taught Most of the books and training in this area deal with skills for jumpstarting alternative thinking brainstorming and other exercises but do not deal with creativity itself They don't tackle the obvious question What is creativity and how can I get it As one of the world's leading artists Lai explains that the reason we don't think creativity can be taught is that we don't really understand what happens in the mysterious process By slowing down the moment of inspiration Lai lets us see exactly the elements involved in this complex process that lasts only an instant Then he shows you how to prepare for this moment through his unique Map of Creativity This is a whole path of training in creativity which he explains clearly and humour and compassion and tailor made exercises

Travis Preston says Stan Lai guides us to the center of the creative moment and the ultimate unity of the spiritual and physical worlds Creativity is a milestone in understanding and learning the creative act Born in America raised in Taiwan with a career spanning the Chinese diaspora Lai believes that we are all born creative but the source to creativity has been blocked by life How to take down the barriers that are blocking the source from us is a task of unlearning many things that have become habits and put us into a so called non creative mode Taking his cue from his Buddhist training that wisdom and method are both needed for success in any endeavour he explains how wisdom has mysteriously vanished from education systems all over Most teaching in creativity focuses on method which one learns in one's art But we need another type of training more urgently the training for wisdom which can only happen in the domain of life To do you must first be To discover your creativity you must first discover yourself Octavian Saiu says This book is not a manual but a statement of belief an enduring message about how each of us can go beyond our limits

Business and Dynamic Change Keith D. Swenson, Frank F. Kowalkowski, Michael G. Miller, William Ulrich, Gil Laware, Brian K. Seitz, Martin Klubeck, Dr Michael Poulin, Jude Chagas Pereira, Michael Blaha, J. Bryan Lail, Patrik Maltusch, Darius Silingas, David Rice, Michael S. Connor, 2019-10-23 The chapters in this book are contributed by visionaries who see the need for business leaders to define their organizations to be agile and robust in the face of external changes The goal is to build something knowing that it will be changed so that you have no need to go back to the metaphorical drawing board for every market condition change In his Foreword Keith Swenson asks you Consider what it means to say that the business will adapt in the face of external changes The business architecture is not simply a model that specifies how to run the business for now and the next few years The people making the architecture cannot know the pressures that will be faced Instead it must support leaders and executives within the organization to make consistently good decisions on how to adapt their practices The architecture is not a plan that anticipates all the decisions instead it embodies a set of core guiding principles that enable decision making Understand that the term business used this way is not limited to for profit enterprises but includes all forms of organizations that have a strategic need to accomplish goals Pragmatically speaking business architecture is the conceptual understanding that people have on why particular choices were made in forming the organization in a particular way This book will help you understand your options and how to relate them to your own organization
