Lessons in the Structure, Life, and Growth of Plants Alphonso Wood, 1889 *The American Benedictine Review*, 1982 **Studi Internazionali Di Filosofia**, 1971 **The New Natural Resource** Professor Hans Christian Garmann Johnsen, 2014-06-28

The New Natural Resource is a book about the role of knowledge in social and economic development There is a need to address the process of developing knowledge as a social process and *The New Natural Resource* starts with the argument that knowledge is inherently a social phenomenon This allows us to discuss the relation between individual opinions and what is regarded as knowledge It also allows us to see how economic and political and democratic processes are interrelated Acknowledging that we are more dependent on contesting processes of knowledge development in society implies that we should address how society as a whole is able to legitimize what it regards as the right kind of knowledge *The New Natural Resource* Hans Christian Garmann Johnsen, 2016-03-03 Increasingly in the public discourse there are references to the knowledge economy knowledge society knowledge workers and knowledge organisations The argument is that knowledge is becoming the main economic

resource replacing the natural resources that drove the industrial revolution The new knowledge economy is driven by knowledge development innovation and highly skilled employees Increasing investment in higher education and in universities is in line with this strategy and understanding In an earlier book *Creating Collaborative Advantage* edited with Richard Ennals Professor Hans Christian Garmann Johnsen argued that it is knowledge that links social and economic processes He believes that what is missing in the current discussion on innovation is a conceptualisation of exactly what knowledge is In *The New Natural Resource* he digs deeper into what it is and how it develops and subsequently leads to widespread change The author argues that knowledge is inherently a social phenomenon That is why social processes are closely linked to economic development and why this relationship becomes even more apparent in the new knowledge economy Knowledge is not an objective entity established once and for all Knowledge development is interrelated with values norms perceptions and interpretations We need to know what the mechanisms are by which knowledge becomes legitimate true and relevant

The Production of Reality Jodi O'Brien,1997 *Contemporary Philosophy in Scandinavia* Raymond E.
