

# PRINCIPLES OF SUSTAINABLE DEVELOPMENT

## Fairness Across Generations (Intergenerational Equity)

01

We must meet today's needs without compromising the ability of future generations to meet theirs.

## Justice Within Our Generation (Intragenerational Equity)

02

Everyone should have equal access to resources, opportunities, and a decent quality of life.

## Protecting Our Planet (Environmental Stewardship)

03

Safeguarding ecosystems, reducing pollution, and conserving biodiversity are essential for a sustainable future.

## Smart Decision-Making (Integrated Approach)

04

Economic, social, and environmental factors should be considered together for balanced progress.

## The "Better Safe Than Sorry" Rule (Precautionary Principle)

05

If an action may cause harm, take preventive measures even without full scientific certainty.

## Public Participation & Transparency

06

Informed and engaged communities drive better decisions for sustainability.

## Making Polluters Pay (Polluter Pays Principle)

07

Those responsible for environmental damage should bear the costs of fixing it.

## Shared Responsibility, Different Capabilities

08

All nations should work toward sustainability, but wealthier countries must support those with fewer resources.

# Sustainable Development Introduction Guide

**George Kararach, Emmanuel Pinto  
Moreira, Victor Murinde**

## **Sustainable Development Introduction Guide:**

**Sustainable Development** David Reid, 2013-11-05 Sustainable development is the catchphrase of the 1990s. Governments around the world, international institutions, local organizations, and NGOs have committed themselves to its principles and have adopted policies to promote it. But sustainable development is difficult to define, let alone implement, and its proponents and advocates may all interpret it in very different ways. This introductory guide provides a clear and accurate account of what sustainable development actually is. David Reid gives an overview of the history of the concept and how it has evolved in recent years, describes the obstacles to achieving sustainable development and looks at recent progress towards implementing it and at how much we have still to do.

**Essential Concepts for Implementing the Sustainable Development Goals** Frank Biermann, Thomas Hickmann, Yi Hyun Kang, Carole-Anne S nit, Yixian Sun, 2025-06-10 This book provides a highly accessible and easy-to-navigate overview of the essential concepts and terms related to the current global endeavour to implement the Sustainable Development Goals. With the first decade of the 15-year timespan of the 2030 Agenda now past, the SDGs show limited progress and several goals are even regressing. It is imperative that SDG implementation is accelerated until 2030 and beyond to foster transformations and set the world onto a sustainable and resilient path. The book starts with a thematic introduction to contextualize the topic and set the stage for the individual entries. It then follows an A-Z format with over 100 entries which describe an important concept or term using practical examples to illustrate how it connects to the overall debate about sustainable development. It offers swift introductions to key concepts and terms that are discussed and explained by scholarly and policy experts from around the world in a concise and user-friendly way. The guide is comprehensive in scope, practically oriented, and focused on political and societal processes to drive change on a larger scale. With cross-references to related terms in the entries, this book will be a highly valuable resource for students and practitioners engaged with the SDGs and sustainable development more broadly.

**Introductory Guide to Planning and Environmental Protection**, *Transformative Sustainability Education* Elizabeth A. Lange, 2023-03-28 This book lays out the principles and practices of transformative sustainability education using a relational way of thinking and being. Elizabeth A. Lange advocates for a new approach to environmental and sustainability education that of rethinking the Western way of knowing and being and engendering a frank discussion about the societal elements that are generating climate, environmental, economic, and social issues. Highlighting the importance of Indigenous and life-giving cultures, the book covers educational theory, transformation stories of adult learners, social and economic critique, and visions of changemakers. Each chapter also has a strong pedagogical element with entry points for learners and embodied practices and examples of taking action at micro, meso, macro levels woven throughout. Overall, this book enacts a relational approach to transformative sustainability education that draws from post-humanist theory, process thought, relational ontology, decolonization theory, Indigenous philosophy, and a spirituality that builds a sense of sacred towards the living world.

Written in an imaginative storytelling manner this book will be a great resource for formal and nonformal environmental and sustainability educators
