International Students from Asia in Canadian Universities Ann Kim,Elizabeth Buckner,Jean Michel Montsion,2023-08-11

This book explores how the recruitment and retention of Asian international students in Canadian universities intersects with other institutional priorities. Responding to the growing need for new insights and perspectives on the institutional mechanisms adopted by Canadian universities to support Asian international students in their academic and social integration to university life, it crucially examines the challenges at the intersection of two institutional priorities: internationalization and anti-racism. This is especially important for the Asian international student group who are known to experience invisible forms of discrimination and differential treatment in Canadian post-secondary education institutions. The authors present new conceptualisations and theoretical perspectives on topics including international students' experiences and understandings of race and racism, comparisons with domestic students and/or non-Asian students, institutional discourse and narratives on Asian international students, comparison with other university priorities, cross-national comparisons, best practices and recent developments linked to the COVID-19 pandemic. Foregrounding the institutional strategies of Canadian universities as opposed to student experience exclusively, this direct examination of institutional responses and initiatives draws out similarities and differences across the country, compares them within the broader array of university priorities and ultimately offers the opportunity for Canadian universities to learn from each other in improving the integration of Asian international students and others to their student body. It will appeal to teacher-scholars, researchers and educators with an interest in higher education, international education and race and ethnic studies. **History Education and the Truth Problem** Terry Haydn, 2026-05-01. With misinformation and distorted versions of the past gaining dangerous traction worldwide, it is crucial that students and adults can discern between good and bad history and make accurate and well-founded judgements on contemporary issues and problems. This timely book explores the concept of truth in the discipline of history and argues that history education must evolve to combat the post-truth crisis. The book examines how recent changes in society and in technology have had a disruptive influence on both the writing of history and on its consumption and use, and the consequences of this for the health and vitality of societies worldwide. It considers how history education might address the truth problem more effectively so students understand how knowledge is constructed, questioned and deployed, and can make intelligent and rational decisions about what to believe, both about the past and the present. Offering innovative approaches for adapting history education for our technological age, this book is essential reading for history educators, historians and all those who are interested in history and concerned about the slide into a post-truth world.
