Whither China? John David Kadvanly, 2001 Whither China presents an in depth and wide angled picture of Chinese intellectual life during the last decade of the millennium as China struggled to move beyond the shadow of the Tiananmen tragedy Because many cultural and intellectual paradigms of the previous decade were left in ruins by that event Chinese intellectuals were forced in the early 1990s to search for new analytical and critical frameworks Soon however they found themselves engulfed by tidal waves of globalization surrounded by a new social landscape marked by unabashed commodification and stunned by a drastically reconfigured socialist state infrastructure The contributors to Whither China describe how instead of spearheading the popular mandated and state sanctioned project of modernization intellectuals now find themselves caught amid rapidly changing structures of economic social political and cultural relations that are both global in nature and local in an irreducibly political sense Individual essays interrogate the space of Chinese intellectual production today lay out the issues at stake and cover major debates and discursive interventions from the 1990s Those who write within the Chinese context are joined by Western observers of contemporary Chinese cultural and intellectual life Together these two groups undertake a truly international intellectual struggle not only to interpret but to change the world Contributors Rey Chow Zhiyuan Cui Michael Dutton Gan Yang Harry Harootunian Peter Hitchcock Rebecca Karl Louisa Schein Wang Hui Wang Shaoguang Xudong Zhang

The Red Guard Generation and Political Activism in China Guobin Yang, 2016-05-17 Raised to be

flowers of the nation the first generation born after the founding of the People's Republic of China was united in its political outlook and at first embraced the Cultural Revolution of 1966 but then split into warring factions Investigating the causes of this fracture Guobin Yang argues that Chinese youth engaged in an imaginary revolution from 1966 to 1968 enacting a political mythology that encouraged violence as a way to prove one's revolutionary credentials This same competitive dynamic would later turn the Red Guard against the communist government Throughout the 1970s the majority of Red Guard youth were sent to work in rural villages where they developed an appreciation for the values of ordinary life From this experience an underground cultural movement was born Rejecting idolatry these relocated revolutionaries developed a new form of resistance that signaled a new era of enlightenment culminating in the Democracy Wall movement of the late 1970s and the Tiananmen protest of 1989 Yang's final chapter on the politics of history and memory argues that contemporary memories of the Cultural Revolution are factionalized along these lines of political division formed fifty years before

Asiatica Charles Hertel Egerton, 1928 *Whither China* Morris Rothenberg, 1977 Trods titlen handler bogen ikke om Kina men om Sovjetunionen og hvad dens ledere tænker om Kina og den virkning deres tanker har på Sovjets globale politik nu og i fremtiden **China's Information and Communications Technology Revolution** Xiaoling Zhang, Yongnian Zheng, 2009-03-20 In recent years China has experienced a revolution in information and communications technology ICT in

2003 surpassing the USA as the world's largest telephone market and as of February 2008 the number of Chinese Internet users has become the largest in the world. At the same time China has overtaken the USA as the world's biggest supplier of information technology goods. However, this transformation has occurred against the backdrop of a resolutely authoritarian political system and strict censorship by the Party state. This book examines China's ICT revolution, exploring the social, cultural, and political implications of China's transition to a more information-rich and communication-intensive society. The pace of the development of ICT in China has precipitated much speculation about political change and democratisation. This book explores the reality of ICT in China, showing clearly that whilst China remains a one-party state with an ever-present and sophisticated regime of censorship, substantial social and political changes have taken place. It considers the ICT revolution in all its aspects, outlining the dominant trends, the impact on other countries of China as an ICT exporter, strategies of government censorship and use of ICT for propaganda, the implications of censorship for Chinese governance, the political implications of internet culture and blogging, and the role of domestic and foreign NGOs. Overall, this book is a vital resource for anyone seeking to understand a rapidly transforming China both today and in the years to come. **One**
