Strength in Numbers: The Rising of Academic Statistics Departments in the U. S. Alan Agresti, Xiao-Li Meng, 2012-11-02 Statistical science as organized in formal academic departments is relatively new. With a few exceptions, most Statistics and Biostatistics departments have been created within the past 60 years. This book consists of a set of memoirs, one for each department in the U.S. created by the mid 1960s. The memoirs describe key aspects of the department's history, its founding, its growth, key people in its development, success stories such as major research accomplishments and the occasional failure story, PhD graduates who have had a significant impact, its impact on statistical education, and a summary of where the department stands today and its vision for the future. Read here all about how departments such as at Berkeley, Chicago, Harvard, and Stanford started and how they got to where they are today. The book should also be of interest to scholars in the field of disciplinary history.

Strength in Numbers G. Elliott Morris, 2022-07-12 An insightful exploration of political polling and a bold defense of its crucial role in a modern democracy. Public opinion polling is the ultimate democratic process; it gives every person an equal voice in letting elected leaders know what they need and want. But in the eyes of the public, polls today are tarnished. Recent election forecasts have routinely missed the mark, and media coverage of polls has focused solely on their ability to predict winners and losers. Polls deserve better. In *Strength in Numbers*, data journalist G. Elliott Morris argues that the larger purpose of political polls is to improve democracy, not just predict elections. Whether used by interest groups, the press, or politicians, polling serves as a pipeline from the governed to the government, giving citizens influence they would otherwise lack. No one who believes in democracy can afford to give up on polls; they should commit instead to understanding them better. In a vibrant history of polling, Morris takes readers from the first semblance of data gathering in the ancient world through to the development of modern-day scientific polling. He explains how the internet and big data have solved many challenges in polling and created others. He covers the rise of polling aggregation and methods of election forecasting, reveals how data can be distorted and misrepresented, and demystifies the real uncertainty of polling. Candidly acknowledging where polls have gone wrong in the past, Morris charts a path for the industry's future where it can truly work for the people. Persuasively argued and deeply researched, *Strength in Numbers* is an essential guide to understanding and embracing one of the most important and overlooked democratic institutions in the United States.

Black Faces in White Places Randal Pinkett, Jeffrey Robinson, Philana Patterson, 2011 Discover how African American professionals can combine their personal strengths with the wisdom of others to plant the seeds of a positive, lasting legacy in the workplace. Randal Pinkett was the first African American winner on *The Apprentice*. When he won, he also became the only contestant to be asked to share his victory with a white woman. For generations, African Americans have been told that they need to work twice as hard as everyone else to succeed. However, as millions of black Americans were reminded by Pinkett's experience, sometimes hard work is not enough. *Black Faces in White Places* is

about the game the competitive world in which we all live and work The book offers 10 revolutionary strategies for playing mastering and changing the game for the current generation while undertaking a wholesale redefinition of the rules for those who will follow In this book you will Expand yourself beyond your comfort zone Recognize and demonstrate the four facets of excellence Build beneficial relationships and powerful networks Identify different mentors and learn from others experiences Discover ways of working with others to facilitate collective action Based on the authors considerable experiences in business in the public eye and in the minority the book shows how African American professionals can and must think and act both entrepreneurially and intrapreneurially Black Faces in White Places not only explains shattering the old glass ceiling and changing the concept of success but also examines the four dimensions of the contemporary black experience identity society meritocracy and opportunity Strength in Numbers G.
