**The Expression of the Emotions in Man and Animals** Charles Darwin,2016-02-22 INTRODUCTION MANY works have been written on Expression but a greater number on Physiognomy that is on the recognition of character through the study of the permanent form of the features With this latter subject I am not here concerned The older treatises 1 which I have consulted have been of little or no service to me The famous Conferences 2 of the painter Le Brun published in 1667 is the best known ancient work and contains some good remarks Another somewhat old essay namely the Discours delivered 1774 1782 by the well known Dutch anatomist Camper 3 can hardly be considered as having made any marked advance in the subject The following works on the contrary deserve the fullest consideration Sir Charles Bell so illustrious for his discoveries in physiology published in 1806 the first edition and in the third edition of his Anatomy and Philosophy of Expression 4 He may with justice be said not only to have laid the foundations of the subject as a branch of science but to have built up a noble structure His work is in every way deeply interesting it includes graphic descriptions of the various emotions and is admirably illustrated It is generally admitted that his service consists chiefly in having shown the intimate relation which exists between the movements of expression and those of respiration One of the most important points small as it may at first appear is that the muscles round the eyes are involuntarily contracted during violent expiratory efforts in order to protect these delicate organs from the pressure of the blood This fact which has been fully investigated for me with the greatest kindness by Professors Donders of Utrecht throws as we shall hereafter see a flood of light on several of the most important expressions of the human countenance The merits of Sir C Bell s work have been undervalued or quite ignored by several foreign writers but have been fully admitted by some for instance by M Lemoine 5 who with great justice says Le livre de Ch Bell devrait etre medite par quiconque essaye de faire parler le visage de l homme par les philosophes aussi bien que par les artistes car sous une apparence plus legere et sous le pretexte de l esthetique c est un des plus beaux monuments de la science des rapports du physique et du moral
