Nalley, and Patrisius Warduna,2020-01-15 As its name shows that is On Teaching That Works this book is about teaching that hopefully can empower our students to be better in their life in and after their formal schooling To be better is of course not just dependent on teaching it also depends on learning That is students can indeed be better in and beyond schools if they learn harder smarter day by day throughout their life span Learning harder smarter is ideally the result of among other things how teachers teach their students This is why this book covers also some issues related to learning a process through which learners can move individually and or collectively from being dependent to being independent with characters that are universally acceptable In that sense although the focus of this book seems to be in and around the teaching and learning of writing in general in English as a foreign language EFL in particular it may also be relevant for those who are interested in educational issues in general like how a teacher can be an inspiring one and not just a good or a superior one Chapter Four or how our schools should be redesigned in order to make them more effective in empowering our students in and beyond their formal educational processes Chapter 9 We have to acknowledge that the articles presented in this book have been made public before either in

academic journals or in academic seminars We believe that by transferring those articles into a book form the ideas we have discussed before can then have broader audience and therefore be more beneficial for its audience worldwide We believe however that this book is not a perfect one We are therefore looking forward to having any criticism from our readers to make it better in the future
