Text Storage and Retrieval Systems William Saffady,1989 *Information Storage and Retrieval Systems* Gerald J. Kowalski,Mark T. Maybury,2005-11-19 Chapter 1 places into perspective a total Information Storage and Retrieval System This perspective introduces new challenges to the problems that need to be theoretically addressed and commercially implemented Ten years ago commercial implementation of the algorithms being developed was not realistic allowing theoreticians to limit their focus to very specific areas Bounding a problem is still essential in deriving theoretical results But the commercialization and insertion of this technology into systems like the Internet that are widely being used changes the way problems are bounded From a theoretical perspective efficient scalability of algorithms to systems with gigabytes and terabytes of data operating with minimal user search statement information and making maximum use of all functional aspects of an information system need to be considered The dissemination systems using persistent indexes or mail files to modify ranking algorithms and combining the search of structured information fields and free text into a consolidated weighted output are examples of potential new areas of investigation The best way for the theoretician or the commercial developer to understand the importance of problems to be solved is to place them in the context of a total vision of a complete system Understanding the differences between Digital Libraries and Information Retrieval Systems will add an additional dimension to the potential future development of systems The collaborative aspects of digital libraries can be viewed as a new source of information that dynamically could interact with information retrieval techniques *Text Retrieval Systems In Information Management* G G Chowdhury,1996 This Book Aims At Helping The Reader Develop A Clear Under Standing Of Text Retrieval Systems Including Its Nature And Characteristics Steps To Be Followed In Developing A Text Retrieval System Software Packages Available For The Purpose Guidelines For Choosing An Appropriate Software And So On To Make The Text Suitable For All Kinds Of Readers Chapters And The Basics Of Database Technology Database Management And File Structures Appropriate For Text Retrieval Systems Have Been Provided This Book Also Discusses The Major Features Of Library Management Systems Lmss The Software Packages Used For Automating Library House Keeping Operations The Trend Is To Developing Systems Which Can Provide The Actual Information Sought By The Use Rather Than Reference To The Information Sources Or Part Of The Text Where The Search Term Appears Such Systems Apply Expert Systems And Natural Language Processing Techniques And Are Called Knowledge Based Systems Kbss This Book Describes Features Of These Systems And Mentions Some Of The Applications Of Kbss In Library And Information Activities
