*The 100 Greatest MS-DOS Games* Tom Crossland,2022-11-07 MS-DOS games encompassed the 1980s and 1990s and are regarded to be a golden era for home gaming. How could it not be a golden era with games like Doom, Quake, The Secret of Monkey Island, Star Wars X-Wing, and so on? The DOS era left behind enough happy gaming memories to last a lifetime. So let's go ahead now and explore the 100 greatest games of the beloved DOS era.

*Internet-ontologies-Things* Sungyong Ahn,2023-09-21 Internet ontologies-Things explores how power mobilizes algorithmic and ontological objects for example smartwatches and smart buildings to uncover hidden problems within the physical domains of the IoT. One popular approach of software studies in recent times is to think of algorithmic objects like the things in what is known as the Internet of Things (IoT) as ontological agents to the same extent as the humans who use them. While post-humanist philosophies such as speculative realism and object-oriented ontology have provided a theoretical foundation for this methodological elevation of objects to autonomous and sentient beings, the complicity between this philosophical discourse and the material transformation of our everyday lives which are embedded with these smart objects remains relatively underexplored. Within this constantly changing infrastructure, Internet ontologies-Things: Smart Objects, Hidden Problems, and their Symmetries reveals a new form of economic and political power whose algorithmic governance finds its legitimacy in our newly cultivated paranoia about unknown and perhaps unknowable computational problems. In its examination of our smart world, this book illuminates the mechanisms by which this power mobilizes various algorithmic and ontological objects from smart wearables to smart buildings to identify a greater number of hidden problems within the physical domains of the IoT from city sidewalks to the nerves and organs of our very own bodies.

*Case-Based Reasoning Research and Development* Manuela Veloso, Agnar Aamodt,1995-10-16 This book constitutes the refereed proceedings of the First International Conference on Case-Based Reasoning (ICCBR 95) held in Sesimbra, Portugal in October 1995. The 52 revised papers included are classified as scientific papers, application papers, and posters. All current aspects of research and development aiming at industrial applications in CBR are addressed. Among the topical sections are case and knowledge representation, case retrieval, nearest neighbour methods, case adaptation and learning, cognitive modelling, integrated reasoning methods, and application-oriented methods, planning, decision making, diagnosis, interpretation, design, etc.

*Artificial Intelligence in Education* R. Luckin, K.R. Koedinger, J. Greer,2007-06-29 The nature of technology has changed since Artificial Intelligence in Education (AIED) was conceptualised as a research community and Interactive Learning Environments were initially developed. Technology is smaller, more mobile, networked, pervasive, and often ubiquitous, as well as being provided by the standard desktop PC. This creates the potential for technology-supported learning wherever and whenever learners need and want it. However, in order to take advantage of this potential for greater flexibility, we need to understand and model learners and the contexts with which they interact in a manner that enables us to design, deploy, and evaluate technology to most effectively support learning.

across multiple locations subjects and times The AIED community has much to contribute to this endeavour This publication contains papers posters and tutorials from the 2007 Artificial Intelligence in Education conference in Los Angeles CA USA
