Humankind and Humanity in the Philosophy of the Enlightenment Stefanie Buchenau,Ansgar Lyssy,2023-08-24 What makes us human beings Is it merely some corporeal aspect or rather some specific mental capacity language or some form of moral agency or social life Is there a gendered bias within the concept of humanity How do human beings become more human and can we somehow cease to be human This volume provides some answers to these fundamental questions and more by charting the increased preoccupation of the European Enlightenment with the concepts of humankind and humanity Chapters investigate the philosophical concerns of major figures across Western Europe including Montesquieu Diderot Rousseau Locke Hume Ferguson Kant Herder Johann Friedrich Blumenbach and the Comte de Buffon As these philosophers develop important descriptive and comparative approaches to the human species and moral and social ideals of humanity they present a view of the Enlightenment project as a particular kind of humanism that is different from its Ancient and Renaissance predecessors With contributions from a team of internationally recognized scholars including Stephen Gaukroger Michael Forster C line Spector Jacqueline Taylor and G nter Z ller this book offers a novel interpretation of the Enlightenment that is both clear in focus and impressive in scope

The Origin of Humankind Massimiliano Aloisi,2000 This volume deals with the fascinating topic of the origin of humankind Some of its important areas from palaeontology to genetics have yielded striking contributions However it also has aspects that transcend science and probe deeply into domains that do not pertain to scientific culture proper such as religion and philosophy The volume brings together contributions from a group of palaeontologists and geneticists who present an update of knowledge on the topic the Out of Africa theory the demise of the Neanderthal and the Italian scene

The Struggle for Life and the Modern Italian Novel, 1859-1925 Andrea Sartori,2022-11-22 This book explores Darwinism in modern Italian literature In the years between Italy s unification 1861 and the rise of fascism many writers gave voice to anxieties connected with the ideas of

evolution and progress This study shows how Italian authors borrowed and reworked a scientific vocabulary to write about the contradictions and the contrasting tensions of Italy's cultural and political economic modernization It focuses above all on novels by Italo Svevo Federico De Roberto and Luigi Pirandello The analysis centers on such topics as the struggle against adverse social conditions in capitalistic society the risk of failing to survive the struggle itself the adaptive issues of individuals uprooted from their family and work environments the concerns about the heredity of maladapted characters Accordingly the book also argues that the hybridization and variation of both narrative forms and collective mindsets describes the modernist awareness of the cultural complexity experienced in Italy and Europe at this time

Our Occulted History Jim Marrs, 2013-02-12 The author of Alien Agenda illustrates how human civilization may have originated with non humans who visited earth eons ago and may still be here For years we've been taught that human progress has been a long slow climb from the primordial ooze to hunter gatherers to empires But what if that's only part of the story Bestselling author and legendary conspiracy researcher Jim Marrs who has investigated the recent financial crisis the JFK assassination and the national socialist takeover of America now takes on his biggest subject the history of mankind Our Occulted History overturns conventional knowledge and beliefs presenting compelling evidence that the earth once hosted prehistoric civilizations using technologies that very well may have surpassed our own Sound unbelievable Just a few hundred years ago so was the concept that the earth revolved around the sun Marrs sifts through the historical scientific and cultural record showing how numerous ancient texts and tablets tell of visitors from the stars colonizing the earth From the flying vimanas of the Hindu Vedic literature and the flying shields reported by the Romans to the mysterious airships of the 1800s and the UFOs of today he argues that someone other than us is still present on this planet But are these visitors simply observers or do they play a much more active and controlling role Jim Marrs raises this shocking question and more in the provocative and persuasive Our Occulted History The truth is out there and in here
