## **The Hungry Future:**

The Hungry Future René Dumont, Bernard Rosier, 1969      **The Hungry Millions** Naunihal Singh, 2004 In View Of The Population Explosion That Faces The World The Author Thinks That We Are At The Edge Of Famine And The Crisis In The Global Context Has Been Laid Along With Search Of Appropriate Solutions This Is Done In 21 Chapters An Index Is Provided      **Food Policy** Tim Lang, David Barling, Martin Caraher, 2009-03-19 For over half a century food policy has mapped a path for progress based upon a belief that the right mix of investment scientific input and human skills could unleash a surge in productive capacity which would resolve humanity's food related health and welfare problems It assumed that more food would yield greater health and happiness by driving down prices increasing availability and feeding more mouths In the 21st century this policy mix is quietly becoming unstuck In a world marred by obesity alongside malnutrition climate change alongside fuel and energy crises water stress alongside more mouths to feed and social inequalities alongside unprecedented accumulation of wealth the old rubric of food policy needs re evaluation This book explores the enormity of what the new policy mix must address taking the approach that food policy must be inextricably linked with public health environmental damage and social inequalities to be effective Written by three authors with differing backgrounds one in political science another in environmental health and health promotion and the third in social psychology this book reflects the myriad of perspectives essential to a comprehensive view of modern food policy It attempts to make sense of what is meant by food policy explores whether the term has any currency in current policy discourse assesses whether current policies help or hinder what happens judges whether consensus can triumph in the face of competing bids for understanding looks at all levels of governance across the range of actors in the food system from companies and the state to civil society and science considers what direction food policies are taking not just in the UK but internationally assesses who and what gains or loses in the making of these food policies and identifies a modern framework for judging how good or limited processes of policy making are This book provides a major comprehensive review of current and past food policy thinking and proposing the need for what the authors call an ecological public health approach to food policy Nothing less will be fit for the 21st century      Perishability Fatigue Vincent Bruyere, 2018-09-25 The Svalbard Global Seed Vault project is an arctic archive designed to preserve the world's agricultural biodiversity What do it and other novel forms of storage tell us about our relationship to the future in a time of resource depletion and extinction scenarios In this innovative book Vincent Bruyere offers an invitation to look at the present we live in through a fresh lens the difference between storage and burial in the age of sustainability science Perishability Fatigue considers questions of permanence and the potentiality of retrieval noting the tensions within our collective sense of time and finitude Bruyere reflects on the nature and significance of perishability asking what it means to have one's sense of temporality engendered by seed banks and frozen embryo storage genetically modified organisms and the de extinction of species nuclear waste repositories oncology and palliative care He draws

attention to the scripts and scenarios that mediate our relations to loss and decay preservation and conservation emphasizing the inequalities implicit in technologies of perishability which promise continuity in the future to some while refusing it to others A highly interdisciplinary study Perishability Fatigue reframes the environmental humanities and humanistic inquiry into sustainability science by developing a new language to commemorate fatigue and transience in a culture of preparedness and survival
