## So Deep Is The Ocean:

The Deep Ocean Michael Vecchione, Louise Allcock, Imants Priede, Hans van Haren, 2023-04-18 The deep ocean comprises more than 90 percent of our planet's biosphere and is home to some of the world's most dazzling creatures which thrive amid extreme pressures scarce food supplies and frigid temperatures Living things down here behave in remarkable and surprising ways and cutting edge technologies are shedding new light on these critically important ecosystems This beautifully illustrated book leads you down into the canyons trenches and cold seeps of the watery abyss presenting the deep ocean and its inhabitants as you have never seen them before

Sid and the Very Hard to Find Squid James O'Hanlon, 2025-06-02 No one has ever seen a colossal squid in the wild but Sid is determined to be the first Join Sid on his exciting quest to find this incredibly rare animal Along the way Sid encounters other strange creatures until he eventually discovers that sometimes the joy of exploration is more about the unexpected journey and not the ending Look closely and you might just find a cheeky colossal squid too Reading level varies from child to child but we recommend this book for ages 5 to 9

*Extinction* Douglas H. Erwin, 2015-03-22 Some 250 million years ago the earth suffered the greatest biological crisis in its history Around 95 percent of all living species died out a global catastrophe far greater than the dinosaurs demise 185 million years later How this happened remains a mystery But there are many competing theories Some blame huge volcanic eruptions that covered an area as large as the continental United States others argue for sudden changes in ocean levels and chemistry including burps of methane gas and still others cite the impact of an extraterrestrial object similar to what caused the dinosaurs extinction Extinction is a paleontological mystery story Here the world's foremost authority on the subject provides a fascinating overview of the evidence for and against a whole host of hypotheses concerning this cataclysmic event that unfolded at the end of the Permian After setting the scene Erwin introduces the suite of possible perpetrators and the types of evidence paleontologists seek He then unveils the actual evidence moving from China where much of the best evidence is found to a look at extinction in the oceans to the extraordinary fossil animals of the Karoo Desert of South Africa Erwin reviews the evidence for each of the hypotheses before presenting his own view of what happened Although full recovery took tens of millions of years this most massive of mass extinctions was a powerful creative force setting the stage for the development of the world as we know it today In a new preface Douglas Erwin assesses developments in the field since the book's initial publication

*Expedition Deep Ocean* Josh Young, 2020-12-01 The riveting story of the exploration of the final frontier of our planet the deep ocean and history making mission to reach the bottom of all five seas Humankind has explored every continent on earth climbed its tallest mountains and gone into space But the largest areas of our planet remain largely a mystery the deep oceans At over 36 000 feet deep there areas closest to earth's core have remained nearly

impossible to reach until now Technological innovations engineering breakthroughs and the derring do of a team of explorers led by explorer Victor Vescovo brought together an audacious global quest to dive to the deepest points of all five oceans for the first time in history The expedition pushed technology to the limits mapped hidden landscapes discover previously unknown life forms and began to piece together how life in the deep oceans effects our planet but it was far from easy Expedition Deep Ocean is the inside story of this exploration of one of the most unforgiving and mysterious places on our planet including the site of the Titanic wreck and the little understood Hadal Zone Vescovo and his team would design the most advanced deep diving submersible ever built where the pressure on the sub is 8 tons per square inch the equivalent of having 292 fueled and fully loaded 747s stacked on top of it And then there were hurricane laden ocean waters and the byzantine web of global oceanography politics Expedition Deep Ocean reveals the marvelous and other worldly life found in all five deep ocean trenches including several new species that have posed as of yet unanswered questions about survival and migration from ocean to ocean Then there are the newly discovered sea mounts that cause tsunamis when they are broken by shifting subduction plates and jammed back into the earth crust something that can now be studied to predict future disasters Filled with high drama adventure and the thrill of discovery Expedition Deep Ocean celebrates courage and ingenuity and reveals the majesty and meaning of the deep ocean **Great Thoughts from Master Minds** ,1886

**Antarctic Ecosystems** Alex D. Rogers,Nadine M. Johnston,Eugene J. Murphy,Andrew Clarke,2012-02-28 Since its discovery Antarctica has held a deep fascination for biologists Extreme environmental conditions seasonality and isolation have lead to some of the most striking examples of natural selection and adaptation on Earth Paradoxically some of these adaptations may pose constraints on the ability of the Antarctic biota to respond to climate change Parts of Antarctica are showing some of the largest changes in temperature and other environmental conditions in the world In this volume published in association with the Royal Society leading polar scientists present a synthesis of the latest research on the biological systems in Antarctica covering organisms from microbes to vertebrate higher predators This book comes at a time when new technologies and approaches allow the implications of climate change and other direct human impacts on Antarctica to be viewed at a range of scales across entire regions whole ecosystems and down to the level of species and variation within their genomes Chapters address both Antarctic terrestrial and marine ecosystems and the scientific and management challenges of the future are explored *House Documents* USA Congress House of Representatives,1898
