Social Capital, Professionalism and Diversity, 2009-01-01 Social Capital Professionalism and Diversity is a response to the challenges faced by teachers and other public sector professionals in attempting to manage an increasingly diverse population whilst simultaneously being subjected to public scrutiny through measures of performance Social capital has increasingly been seen by policy makers and academics as a possible resource for education allowing children and young people and the professionals who work with them to do better as a result of having strong networks relationships and trust There has however been little attention to how social capital might actually be used by professionals within educational contexts or to the benefits of enhanced social capital for children and young people their families and the professionals themselves The contributors to this volume provide commentaries on what is known about social capital and its use in educational contexts the engagement of teachers and other professionals with diversity and social capital and diversity among children young people and families Social Capital Professionalism and Diversity will appeal to teacher educators and policymakers with concerns about the challenges faced by teachers and other public sector professionals and with an interest in how social capital might enable an effective response to diversity in educational contexts The book will be of particular interest and use to student and beginning teachers in responding to diversity as they develop their own professional identities and to practising teachers with an interest in pursuing new forms of professional renewal

Social Capital Nan Lin,Karen S. Cook,Ronald S. Burt, Leading scholars in the field of social networks from diverse disciplines present the first systematic and comprehensive collection of current theories and empirical research on the informal connections that individuals have for support help and information from other people Expanding on concepts originally formulated by Pierre Bourdieu and James Coleman this seminal work will find an essential place with educators and students in the fields of social networks rational choice theory institutions and the socioeconomics of poverty labor markets social psychology and race The volume is divided into three parts The first segment clarifies social capital as a concept and explores its theoretical and operational bases Additional segments provide brief accounts that place the development of social capital in the context of the family of capital theorists and identify some critical but controversial perspectives and statements regarding social capital in the literature The editors then make the argument for the network perspective why and how such a perspective can clarify controversies and advance our understanding of a whole range of instrumental and expressive outcomes Social Capital further provides a forum for ongoing research programs initiated by social scientists working at the crossroads of formal theory and new methods These scholars and programs share certain understandings and approaches in their analyses

of social capital They argue that social networks are the foundation of social capital Social networks simultaneously capture individuals and social structure thus serving as a vital conceptual link between actions and structural constraints between micro and macro level analyses and between relational and collective dynamic processes They are further cognizant of the dual significance of the structural features of the social networks and the resources embedded in the networks as defining elements of social capital Nan Lin is professor of sociology Duke University Karen Cook is Ray Lyman Wilber Professor of Sociology Department of Sociology Stanford University Ronald S Burt is Hobart W Williams Professor of Sociology and Strategy University of Chicago Graduate School of Business

Social Capital C.
