Studies In Anaphora Typological Studies In Language:

Studies in Anaphora Barbara A. Fox,1996 The last 15 years has seen an explosion of research on the topic of anaphora Studies of anaphora have been important to our understanding of cognitive processes the relationships between social interaction and grammar and of directionality in diachronic change The contributions to this volume represent the next generation of studies in anaphora defined broadly as those morpho syntactic forms available to speakers for formulating reference taking as their starting point the foundation of research done in the 1980s These studies examine in detail and with a richness of methods and theories what patterns of anaphoric usage can reveal to us about cognition social interaction and language change *Discourse Phenomena in Typological Perspective* Alessandra Barotto,Simone Mattiola,2023-03-15 This book aims at investigating discourse phenomena i e linguistic elements and constructions that help to manage the organization flow and outcome of communication from a typological and cross linguistic perspective Although it is a well established idea in functional typological approaches that grammar is shaped by discourse use systematic typological cross linguistic investigations on discourse phenomena are relatively rare This volume aims at bridging this gap by integrating different linguistic subfields such as discourse analysis pragmatics and typology The contributions both theoretically and empirically oriented focus on a broad variety of discourse phenomena ranging from discourse markers to discourse function of grammatical markers to strategies that manage the discourse and information flow while adopting a typological perspective and considering typologically distant languages **Typological Hierarchies in Synchrony and Diachrony** Sonia Cristofaro,Fernando Zúñiga,2018-07-15 Typological hierarchies are widely perceived as one of the most important results of research on language universals and linguistic diversity Explanations for typological hierarchies however are usually based on the synchronic properties of the patterns described by individual hierarchies not the actual diachronic processes that give rise to these patterns cross linguistically This book aims to explore in what ways the investigation of such processes can further our understanding of typological hierarchies To this end diachronic evidence about the origins of several phenomena described by typological hierarchies is discussed for several languages by a number of leading scholars in typology historical linguistics and language documentation This evidence suggests a rethinking of possible explanations for typological hierarchies as well as the very notion of typological universals in general For this reason the book will be of interest not only to the broad typological community but also historical linguists cognitive linguists and psycholinguists **Studies in Language** ,1995 **Language Typology and Language Universals 2.Teilband** Martin Haspelmath,Ekkehard König,Wulf Oesterreicher,Wolfgang Raible,2008-07-14 No detailed description available for Language Typology and Language Universals 2 Teilband Cognitive Linguistics Investigations June Luchjenbroers,2006-06-01 The total body of papers presented in this volume captures research across a variety of languages and language groups to show how particular elements of linguistic description draw on otherwise separate aspects or fields of linguistic investigation As

such this volume captures a diversity of research interest from the field of cognitive linguistics These areas include lexical semantics cognitive grammar metaphor prototypes pragmatics narrative and discourse computational and translation models and are considered within the contexts of language change child language acquisition language and culture grammatical features and word order and gesture Despite possible differences in philosophical approach to the role of language in cognitive tasks these papers are similar in a fundamental way they all share a commitment to the view that human categorization involves mental concepts that have fuzzy boundaries and are culturally and situation based

Meta-informative Centering in Utterances André W?odarczyk,Hélène W?odarczyk,2013-12-15 The notion of information has nowadays become crucial both in our daily life and in many branches of science and technology In language studies this notion was used as a technical term for the first time about at least fifty years ago It is argued however that Old and New used traditionally for characterising information refer in fact to the meta informative status of communicated chunks of information They provide information about other information Since subjects and objects as attention driven phrases are also related to aboutness the presented Meta Informative Centering MIC framework includes predication theory By applying the MIC theory to their analyses of English German French Polish Russian Greek Latin and Japanese the authors provide comprehensive explanations of the most puzzling aspects of the pragmatic use of basic universal linguistic categories It seems clear now that canonical syntactic patterns their permutations and diverse transformations do indeed reflect very truly the meta informative encapsulation of utterances As a consequence this book presents new and coherent theoretical solutions as well as their very efficient applications *Ellipsis and Reference Tracking in Japanese* Shigeko Nariyama,2003 Printbegr nsninger Der kan printes 10 sider ad gangen og max 40 sider pr session **Anaphora** Yan Huang,2000 Anaphora is a central topic in syntax semantics and pragmatics and to the interface between them It is the subject of advanced undergraduate and graduate courses in linguistics and computational linguistics In this book Yan Huang provides an extensive and accessible overview of the major contemporary issues surrounding anaphora and gives a critical survey of the many and diverse contemporary approaches to it He also provides by far the fullest cross linguistic account of anaphora yet published *Cognitive Linguistics* ,1997 **Typological Studies on Languages in Thailand and Japan** ราชอาณาจักรไทย,Kingkarn Thepkanjana,๒๕๕๓,2012-07 2010 **Studies in the Anaphoric Relations in Bengali** Abhijit Majumdar,2000

A Grammar of Maybrat Philomena Hedwig Dol,2007 Maybrat is a Papuan language which is spoken in the central area of the Bird s Head Peninsula Papua Province Indonesia Despite the fact that it is one of the larger local languages in Papua Province in terms of numbers of speakers a comprehensive grammar on this language has hitherto not been published This book aims to give an overview of the phonology morphology and sy n tax of the Maybrat language as it is spoken by the people of Ayawasi Ideally this work can be used as a reference grammar it gives information about the most important structural and typological aspects of Maybrat With this in mind the grammar is full of illustrative examples centred around
