Semiotics of the Image Yirong Hu, 2025-06-18 This book provides a groundbreaking exploration of image semiotics. Going far beyond traditional analyses of static visual texts, it includes dynamic imagery, literary iconography, and psychological images, offering a holistic view of how semiotics permeates various forms of media and cultural expression. The book integrates various case studies on Chinese culture, providing scholars outside China a unique lens through which to understand Chinese cultural thinking through semiotics. This approach not only enriches the academic discussion but also enhances cross-cultural understanding. In addition, the book collects and synthesizes significant achievements in semiotics, incorporating traditional visual theory research from the Panofsky and Warburg schools. This synthesis forms a comprehensive semiotics of images, providing an interdisciplinary analytical framework for contemporary media spectacles. The book employs multiple methodologies to dissect the visual image spectacles constructed by modern media signs, culminating in a macro-level understanding of cultural spectacles. Furthermore, it situates the comparison between Chinese and Western civilizations within a broad context of cultural philosophy and history, enriching the discourse on cultural differences and similarities.

In the Shadow of Descartes G.H. Von Wright,2013-03-09
Descartes made a sharp distinction between matter and mind But he also thought that the two interact with one another Is such interaction possible however without either a materialist reduction of mind to matter or an idealist phenomenalist reduction of matter to mind These questions overshadow the Western tradition in metaphysics from the time of Descartes to present times The book makes an effort to stay clear of reductivist views of the two Cartesian substances It defends a dualistic psycho physical parallel theory which reconciles freedom of action with determinism in nature Basic problems in perception theory are also discussed with special emphasis on hearing and sound Because of the intrinsic interest of the subject and the author's non technical presentation of it the book should appeal to all readers with a serious interest in philosophy and psychology
