Maternal Death and Pregnancy-Related Morbidity Among Indigenous Women of Mexico and Central America

David A. Schwartz, 2018-05-31 This ambitious sourcebook surveys both the traditional basis for and the present state of indigenous women's reproductive health in Mexico and Central America. Noted practitioners, specialists, and researchers take an interdisciplinary approach to analyze the multiple barriers for access and care to indigenous women that had been complicated by longstanding gender inequities, poverty, stigmatization, lack of education, war, obstetrical violence, and differences in language and customs, all of which contribute to unnecessary maternal morbidity and mortality. Emphasis is placed on indigenous cultures and folkways, from traditional midwives and birth attendants to indigenous botanical medication and traditional healing and spiritual practices, and how they may effectively coexist with modern biomedical care. Throughout these chapters, the main theme is clear: the rights of indigenous women to culturally respectful reproductive health care and a successful pregnancy leading to the birth of healthy children. A sampling of the topics: Motherhood and modernization in a Yucatec village; Maternal morbidity and mortality in Honduran Miskito communities; Solitary birth and maternal mortality among the Rar muri of Northern Mexico; Maternal morbidity and mortality in the rural Trifino region of Guatemala; The traditional Ngbe Bugl midwives of Panama; Characterizations of maternal death among Mayan women in Yucatan, Mexico; Unintended pregnancy, unsafe abortion, and unmet need in Guatemala; Maternal Death and Pregnancy-Related Morbidity Among Indigenous Women of Mexico and Central America. This book is designed for anthropologists and other social scientists, physicians, nurses, and midwives, public health specialists, epidemiologists, global health workers, international aid organizations, and NGOs, governmental agencies, administrators, policy makers, and others involved in the planning and implementation of maternal and reproductive health care of indigenous women in Mexico and Central America, and possibly other geographical areas.

No escape from discrimination: minorities, indigenous peoples and the crisis of displacement, 2017-12-14 The world is currently going through an unprecedented era of migration with tens of millions of people moving to new cities, countries, and continents every year. But though the decision to move can be driven by the search for opportunities and a better life, in many cases, violence, persecution, and other human rights abuses are the primary causes of migration. This is especially the case for minorities and indigenous peoples who, in the context of widespread discrimination, can face a distinct experience of migration where their own agency is severely curtailed, one often characterized by further discrimination as entrenched patterns of exclusion are replicated elsewhere. This report, *No escape from discrimination: minorities, indigenous peoples and the crisis of displacement*, focuses specifically on the situation of minorities and indigenous peoples subjected to this form of forced migration, including its causes, impacts, and potential solutions. Though the most

direct and visible examples arise from the mass displacement of particular ethnic or religious communities due to sectarian violence migration of minorities and indigenous peoples can also result from broader factors such as natural disasters or exclusion In particular the report focuses on four key areas conflict climate change nationalism and land rights where forced displacement among minority and indigenous communities is playing a decisive role in their ability to enjoy their most fundamental human rights The report while calling for a number of positive steps to protect vulnerable communities and provide the means for safe return or resettlement elsewhere also highlights how displacement is generally the culmination of a protracted process of exclusion that leaves minorities and indigenous peoples particularly vulnerable to eviction ethnic cleansing and other abuses Establishing stronger rights protections for all including minorities and indigenous peoples rather than building walls or restricting travel is therefore the only effective way to respond to the reality of displacement and provide a long term solution to the crisis currently unfolding for these groups

The Mexican Revolution Douglas W. Richmond, Sam W. Haynes, 2013-06-07 In 1910 insurgent leaders crushed the Porfirian dictatorship but in the years that followed fought among themselves until a nationalist consensus produced the 1917 Constitution This in turn provided the basis for a reform agenda that transformed Mexico in the modern era The civil war and the reforms that followed receive new and insightful attention in this book These essays the result of the 45th annual Walter Prescott Webb Memorial Lectures presented by the University of Texas at Arlington in March 2010 commemorate the centennial of the outbreak of the revolution A potent mix of factors including the concentration of wealth in the hands of a few thousand hacienda owners rancheros and foreign capitalists the ideological conflict between the Diaz government and the dissident regional reformers and the grinding poverty afflicting the majority of the nation s eleven million industrial and rural laborers provided the volatile fuel that produced the first major political and social revolution of the twentieth century The conflagration soon swept across the Rio Grande indeed The Mexican Revolution shows clearly that the struggle in Mexico had tremendous implications for the American Southwest During the years of revolution hundreds of thousands of Mexican citizens crossed the border into the United States As a result the region experienced waves of ethnically motivated violence economic tensions and the mass expulsions of Mexicans and US citizens of Mexican descent
