Expose yourself to natural stimuli
(e.g., sunlight, the surface of the Earth)

Stress down in the hours before bed

Minimize your exposure to artificial light at night
(e.g., use candles, install light-adjustment software on your PC)

Work on improving your general health
(e.g., by addressing your microbiome and immune status)

Exercise, but not directly before you hit the sack

Consider taking a cold shower or bath prior to sleeping

Stick to a routine
(e.g., go to bed at roughly the same time most days)

Avoid brain stimulants
(e.g., sugary foods, carbs-rich dairy products, coffee)

Handbook of Radio and Optical Networks Tetsuya Kawanishi,2024-10-02 This handbook provides comprehensive knowledge on device and system technologies for seamlessly integrated networks of various types of transmission media such as optical fibers and millimeter and THz waves to offer super high speed data link service everywhere The seamless integration of the knowledge of radio and optical technologies is needed to construct wired and wireless seamless networks High frequency bands such as millimeter wave and THz wave bands where super wideband spectra are available can offer high speed data transmission and high resolution sensing However the expected coverage is limited due to large wave propagation loss Thus convergence of radio and optical links is indispensable to construct worldwide networks The radio and optical technologies share the same physics and are closely related to each other but have been developed independently Therefore there is a big gap between these two fields Bridging the two fields this handbook is also intended as a common platform to design integrated networks consisting of wireless and wired links Full coverage of wireless and wired convergence fields ranging from basics of device and transmission media to applications allows the reader to efficiently access all the important references in this single handbook Further it also showcases state of the art technology and cases of its use
