Planner Remote Jobs:

City Planning for the Public Manager Nicolas A. Valcik, Todd A. Jordan, Teodoro J. Benavides, Andrea D. Stigdon, 2017-09-14 Why should public administrators care about city planning Is city planning not a field ruled by architects and public works personnel Much of city planning in fact requires expertise in areas other than buildings and infrastructure and with city planning expertise urban administrators are empowered to make more informed decisions on matters that involve budgeting economic development tax revenues public relations and ordinances and policies that will benefit the community City Planning for the Public Manager is designed to fill a gap in the urban administration literature offering students and practitioners hands on practical advice from experts with diverse city administration experience and demonstrating where theory and practice intersect Divided into three sections the book provides an overview of the life cycle of a municipality and its services explores city planning applications for planners on a strict budget and walks the reader through a real life planning research project demonstrating how it was formulated implemented and analyzed to produce usable results Topics explored include justifications for specific city services internal and external benchmarking used for city planning common technical tools e g GIS legal aspects of planning and zoning environmental concerns transportation residential planning business district planning and infrastructure City Planning for the Public Manager is required reading for students of urban administration and practicing city administrators interested in improving their careers and their communities

Workflows for e-Science Ian J. Taylor, Ewa Deelman, Dennis B. Gannon, Matthew Shields, 2007-12-31 This collection of articles on Work ows for e Science is very timely and portant Increasingly to attack the next generation of scienti c problems multidisciplinary and distributed teams of scientists need to collaborate to make progress on these new Grand Challenges Scientists now need to access and exploit computational resources and databases that are geographically distributed through the use of high speed networks Virtual Organizations or VOs must be established that span multiple administrative domains and or institutions and which can provide appropriate authentication and author ation services and access controls to collaborating members Some of these VOs may only have a eeting existence but the lifetime of others may run into many years The Grid community is attempting to develop both sta ards and middleware to enable both scientists and industry to build such VOs routinely and robustly This of course has been the goal of research in distributed computing for many years but now these technologies come with a new twist service orie ation By specifying resources in terms of a service description rather than allowing direct access to the resources the IT industry believes that such an approach results in the construction of more robust distributed systems The industry has therefore united around web services as the standard technology to implementsuchserviceorientedarchitecturesandtoensureinteroperability between di erent vendor systems
