Languages, scripts, and Chinese texts in East Asia Peter Francis Kornicki, 2018-01-19 Chinese Writing and the Rise of the Vernacular in East Asia is a wide ranging study of vernacularization in East Asia not only China Japan Korea and Vietnam but also societies that no longer exist such as the Tangut and Khitan empires Peter Kornicki takes the reader from the early centuries of the common era when the Chinese script was the only form of writing and Chinese Buddhist Confucian and medical texts spread throughout East Asia through the centuries when vernacular scripts evolved right up to the end of the nineteenth century when nationalism created new roles for vernacular languages and vernacular

scripts Through an examination of oral approaches to Chinese texts it shows how highly valued Chinese texts came to be read through the prism of the vernaculars and ultimately to be translated This long process has some parallels with vernacularization in Europe but a crucial difference is that literary Chinese was unlike Latin not a spoken language As a consequence people who spoke different East Asian vernaculars had no means of communicating in speech but they could communicate silently by means of written conversation in literary Chinese a further consequence is that within each society Chinese texts assumed vernacular garb in classes and lectures Chinese texts were read and declaimed in the vernaculars What happened in the nineteenth century and why are there still so many different scripts in East Asia How and why were Chinese texts dethroned and what replaced them These are some of the questions addressed in Chinese Writing and the Rise of the Vernacular in East Asia

A History of the Chinese Language Hongyuan Dong, 2020-12-30 A History of the Chinese Language provides a comprehensive introduction to the historical development of the Chinese language from its Proto Sino Tibetan roots in prehistoric times to Modern Standard Chinese Taking a highly accessible and balanced approach it presents a chronological survey of the various stages of the Chinese language covering key aspects such as phonology syntax and semantics The second edition presents a revised and updated version that reflects recent scholarship in Chinese historical linguistics and new developments in related disciplines Features include Coverage of the major historical stages in Chinese language development such as Old Chinese Middle Chinese Early Modern Chinese and Modern Standard Chinese Treatment of core linguistic aspects of the Chinese language including phonological changes grammatical development lexical evolution vernacular writing the Chinese writing system and Chinese dialects Inclusion of authentic Chinese texts throughout the book presented within a rigorous framework of linguistic analysis to help students to build up critical and evaluative skills and acquire valuable cultural knowledge Integration of materials from different disciplines such as archaeology genetics history and sociolinguistics to highlight the cultural and social background of each period of the language Written by a highly experienced instructor A History of the Chinese Language will be an essential resource for students of Chinese language and linguistics and for anyone interested in the history and culture of China
