# COMMON SENSE PHYSICS & COSMOLOGY

ALL PHENOMENA HAVE PHYSICAL ORIGINS!

All universal phenomena such as gravity and light are logically explained by the classical (Galilean) physics, taught in high schools!

The universe has both gravity and antigravity matters in 3-dimensional space!

The Hubble Image of a small region of the observable universe.

Since there can be only one consistent and coherent interpretation of the universe and all universal phenomena, Galilean physics is now proven to be the only correct physics!

**Common Sense Cosmology** Lenard Metzger,2010-07-30 This is a personal alternative view of how the universe came into being where it is going and its place in the cosmos Presented are new concepts about black holes the big bang gravity and time With my apology to Albert Einstein Also included are ideas about photons and atomic structure *Outlines of Cosmic Philosophy, Based on the Doctrine of Evolution* John Fiske,1874 **Outlines of Cosmic Philosophy Based on the Doctrine of Evolution** Fiske,1892 **Outlines of cosmic philosophy, based on the doctrine of evolution, with criticisms on the positive philosophy** John Fiske,1874 **How Shall the Rich Escape?** Frank Seaver Billings,1894 *Outlines of Cosmic Philosophy* John Fiske,1874 **Outlines of Cosmic Philosophy Based on the Doctrine of Evolution, with Criticisms of the Positive Philosophy** John Fiske,1874 **Cosmology** Edward Harrison,2000-03-16 Thoroughly revised and updated introduction to past and present cosmological theory **Skip** Norbert Duerichen,2003 Skip From Common Sense to Cosmology is a book about our failure to apply simple straightforward thinking contributing to a flawed development in our lifestyles social and political systems education and ultimately also in contemporary science Skip is six years old and the author is eight when they meet They are in a small early 1950 s sawmill camp and later become neighbours on small farms The story follows the life of Skip through a series of snapshots describing a proud and independent child and later man who is too stubborn to learn to read He chooses to think and live like a pre literary person gathering his experiences through the oral aspects of his world and in so doing remains firmly embedded in common sense The episodes are humorous unique and true to life The author through his association and friendship with Skip is inspired to embrace a similar common sense in his more literate and scientific world Supported by Skip s keen down to earth judgement the critiques and commentaries show how our contemporary sophisticated abstract thinking has led us astray in many respects Finally the book offers an insight into how Relativity would be judged by the practical thinking individual who bases all judgement and analysis on common sense The book concludes with a fresh and surprising review of those historic events that led up to the Theory of Relativity *The Cosmic Laws, Being Volume Two of the Arcane Teaching Or Secret Doctrine of Ancient Atlantis, Egypt, Chaldea & Greece* ,1909 **Outlines of cosmic philosophy** John Fiske,1902 **A COSMIC BIRTH... STARTING BEFORE ZERO** PSJ (Peet) Schutte,2013-07-12 I explain Genesis 1 v 1 the beginning or birth of the Universe in terms of the Bible using not theology but mathematics I prove Genesis 1 verse 1 to be correct by using mathematics The Bible says IN THE BEGINNING OF CREATION 1 when God made heaven and earth 2 the earth was without form and void 3 with darkness over the face of the abyss Yes this I do explain mathematically and I manage this because I prove and explain four cosmic keys that build the Universe namely The Titius Bode Law The Lagrangian Points The Roche limit and Coanda Effect Everything in nature in the Universe applies these phenomena in how space forms The Titius Bode Law The Lagrangian Points The Roche Coanda Effect forms the Universe in as much as forming stars in spheres and forming

galactica in circles These principles form space and materials This is a process that produces space and that is how the Universe began before the Universe began in space I take the cosmic birth back to before space came about as the Big Bang

**The Writings of John Fiske ...: Outlines of cosmic philosophy** John Fiske,1902 The Century Josiah Gilbert Holland,Richard Watson Gilder,1923 **The Culinary Plagiarist** Jason Peters,2020-05-28 More than a collection of vignettes and stories from garden grill and kitchen The Culinary Plagiarist is a sustained adventure in gustatory delight an intensely private but candid account of desire and all its objects Opinionated on the full range of human experience from fasting to inebriety from sports to politics from religion to raunch it is at once serious humorous ironic reflective grateful allusive and appetitive Along the way it offers a defense of small scale local life of family of place and of the bread we do not live alone by And also the drinks Don t forget the drinks This is a book for people who enjoy being alive whether in the kitchen the pasture the library the barn the trout stream the henhouse or the doghouse or the bedroom *Common Sense about Christian Ethics* Edward Carpenter,1961 *That Unseen Presence* Walter W. Raymond,1927 Cosmic Sense, Common Sense, and Nonsense Douglas Edward Reinhardt,2018-10-24 Cosmology borrows metaphysical and mystical baggage from quantum theory and relativity to explain large scale universal phenomena The singularity in spacetime a dimensionless point is borrowed from General Relativity and is obviously a metaphysical construct since matter energy cannot logically exist in non space and non time The mystical idea of getting something from nothing is borrowed from quantum physicists who inform us that virtual particles can pop into existence out of the vacuum which has zero point energy and can become real particles of matter under certain circumstances This quantum foam as it is called gives a rationale for how the Big Bang could have banged into existence from nothing The idea of space expansion comes from relativity which indicates that space is a flexible physical medium However the notion in cosmology which contradicts relativity is that space is expanding faster than light moving galactic islands from each other at greater and greater distances The patch for the faster than light space expansion contradiction is that matter is not moving faster than light because the matter in galaxies is at rest in space and is just being carried along at superluminal speeds As Michio Kaku says **Scribner's Monthly, an Illustrated Magazine for the People** ,1923 Cosmic Consciousness Richard Maurice Bucke,1905
