**Ab initio Calculation Tutorial** Ryo Maezono,2023-05-16 This textbook covers the framework of first principles analysis applied to materials using density functional theory DFT It provides a set of hands on tutorials using the Quantum ESPRESSO package an open source software for DFT The tutorials are well chosen designed for maximum effectiveness while requiring a minimum of the reader s time and the book describes how the essential components are combined to create the practical applications based on the idea of modeling practical problems of materials The book carefully explains how to prepare the platform to run the tutorials assisted by free software This textbook is useful for students in experimental laboratories for industrial researchers and for those not majoring in theoretical studies but learning individually

**Ab initio Quantum Monte Carlo Tutorial** Ryo Maezono,2026-02-23 This book offers a unique learn by tutorial approach for ab initio quantum Monte Carlo QMC electronic state calculations The ab initio QMC method is a representative Beyond DFT technique that overcomes challenges faced by the widely used density functional theory DFT in materials science This is the first book focusing on simulation operations of ab initio QMC methods in a tutorial format This book explains the theoretical background of the ab initio QMC method as a showcase of many body electron theory attracting interest also from fundamental scientists dealing with quantum many body problems The content of this book is written in an accessible manner targeting the same audience as the author s previous work Ab initio Calculation Tutorial For Materials Analysis Informatics and Design It is structured to allow beginners in simulation from experimental fields and industry to set up practice codes on their personal PCs and learn independently without assuming prior knowledge of many body electron theory or simulation science Readers learn how to solve the problems on intermolecular binding forces in biomolecular systems magnetic descriptions in spintronics and material properties involving discontinuous density distributions such as surfaces interfaces and defects
