There Is A Time:

Is There Time David J. Whicker, 2023-10-10 We live in a culture where there is no time for ourselves We need to slow down and make time for ourselves Make time for the Lord Everybody is self sufficient in everything these days We need to have the right attitude in our service to the Lord God s strategy for successful living character is more important than intelligence The Bible is God s word to man not man s word about God God s word reveals the purpose and plan for man Satan is conditioning us for what he is bringing in the future to make it look acceptable God meant for sex to build a bond between a man and a woman in marriage but man can pervert anything Sex is one of the most powerful things humans have to deal with The seventy weeks of Daniel the cross is at the end of the sixty two weeks the cross is at the beginning of the seven weeks and the cross is in the middle of the final week The cross is what ties this prophecy together The church age was put into place to reach the lost Christ had five things to say about each of the seven church ages description commendation criticism instruction and promises Before Christ is the Tribulation period After Christ is the End Time Tribulation period The Great Tribulation starts with the trumpets and goes until the return of Christ The purpose of the Bible is to reveal Jesus Christ as the Messiah Heaven and hell are real places With one we will always be with God and with the other we will always be separated from God Both will be forever

While There's Time Robert Griffin, 2005-08-24 When I refer to schools in the five essays on education that comprise *While There's Time* I have elementary and secondary schools in mind I approached this writing from the perspective of an insider so to speak as I have worked extensively in the field of education first as a high school teacher and now as a professor of education in a university These essays were prompted by dissatisfaction and a desire Increasingly over the last few years I have felt uncomfortable with the conventional wisdom in my field about how students ought to be educated It just didn t set right with me Labels vary for the mainstream thinking in the profession but let s call it a progressive or neo Deweyian after the philosopher John Dewey approach Some might refer to it simply as modern education Even though its advocates marshal compelling arguments in support of this set of ideas and practices what they are will be spelled out in the essays I was finding in my work in schools that it wasn t getting good enough results with students in the classroom and that in any case it simply didn t fit me as a person or as a professional my values my hopes for schools and students and this society So I felt an inner push to find an educational orientation that I could believe in more than the one that currently dominates in the field of education to the point that it could be called an orthodoxy or at least find something that complements it adds to it These essays represent the results of my quest I have concluded that the philosophical orientations that we most need to affirm and employ as bases for constructing school programs in our time are the very ones which are most often dismissed by professional educators namely conservatism and individualism In these essays I go into the specifics of conservative and libertarian orientations to education explore what all the talk about teaching democracy in the schools is about contrast sports and schools as settings and use the concept of

personal authenticity in a discussion of the work of teaching What holds these five essays together is that they all are grounded in a conservative rather than liberal and individual centered rather than collectivist frame of reference These essays are self contained enough to be read out of order although I did line them up in the way that I think best presents my argument I hope what I offer here informs the debate in this country over the best route to take in educating our children I wrote this book with both general readers and professional educators in mind For general readers I hope what is here will provide them with a better understanding of how professional educators come at their work and thereby enable them to deal with school people more effectively and give them some things they can take into account when determining what ought to go on in their children s education or in schools generally For people in the profession who read this book teachers and administrators those in training to become teachers and so on I believe these writings will provide them with a clearer understanding of the predominant thinking in their field a good way to understand anything is to compare it with something that contrasts with it I would presume and hope that for some educators and educators to be this book will provide them with ideas they can use to guide their work Much of what follows is expressed in the first person I thought that if I brought myself into this book it would encourage readers to bring themselves into it I would like readers to see these writings as my half of a conversation I want them to respond critically to what I have written and extend it take it farther than I have been able to and I don t think they have to be active in the field of education to be able to do that I want readers to decide how if at all what I write changes the way they look at things and what they a
