electronic texts **Interrogating Cultural Studies** Paul Bowman, 2003-01-20 This book presents a new approach to the field of cultural studies in the form of a series of interviews with some of the world's leading and emergent cultural theorists including Simon Critchley, Jeremy Gilbert and Slavoj Žižek. Framed by lively and informative introductions which introduce the work of these thinkers and which also introduce the reader to the crucial importance of the issues that the interviews address. The book is an entertaining introduction to the key ideas in the field, the strengths and problematic weaknesses of cultural studies as a discipline, allowing the reader to chart its development and to identify emerging trends. **The Rhetorics of Feminism** Lynne Pearce, 2013-04-15 Is it possible that changes in rhetorical practice could alter not just how thought is expressed but also how it is made? Through a close stylistic and rhetorical analysis of contemporary feminist writing from the cultural theory of Judith Butler to the popular journalism of Naomi Wolf and Germaine Greer, Lynne Pearce demonstrates how feminist thought is created as well as communicated through the frameworks in which it is presented. By linking rhetorical innovation with feminist epistemology in such a direct way, this is a book that will be of immense methodological as well as theoretical interest to readers, providing valuable insight into the often mysterious processes of conception and composition. *Siegener Periodicum zur internationalen empirischen Literaturwissenschaft*, 1999

List of members in v 1 **Post-Marxism Versus Cultural Studies** Paul Bowman, 2007 Post-Marxism versus Cultural Studies is an innovative exploration of the ethical and political significance of Cultural Studies and Post-Marxist discourse theory. It argues that although Cultural Studies and post-Marxism tend to present themselves as distinct entities, they actually share a project that of taking on the political. Post-Marxism presents itself as having a developed theory of political strategy while Cultural Studies has claimed to be both practical and political. Bowman examines these intertwined, overlapping, controversial and contested claims and orientations by way of a deconstructive reading that is led by the question of intervention: what is the intervention of post-Marxism of Cultural Studies of each into the other and into other institutional and political contexts and scenes? Through considerations of key aspects of Cultural Studies and cultural theory, Post-Marxism versus Cultural Studies argues that the very thing that is fundamental to both of these politicised approaches, the quest to establish a theory of intervention and to relate this to a practice, actually remains frustrated and unrealised as a direct result of the way this has been approached. Because of this stalemate, Post-Marxism versus Cultural Studies proposes a new theory of pragmatic intervention, one that is derived from Derridean deconstruction, post-Marxism and Cultural Studies, and which will be of importance and value for politicised academics and intellectuals working in all areas of political and Cultural Studies. **Key Features** An innovative take on the disciplines of Cultural Studies and Post-Marxism with a clear account of what Cultural Studies and post-Marxism are and why they are important. Offers explanations, accounts and critiques of key figures of Cultural Studies and post-Marxism such as Butler, Derrida, Hall, Laclau, Mowitt, Rorty and Žižek. Draws out the similarities

Handbook of Feminist Research Sharlene Nagy Hesse-Biber,2007 The topic feminist research has too often been neglected in standard research methods books The Handbook of Feminist Research represents the establishment of a new tradition or paradigm in viewing how the research process is implemented Feminist researchers bring unique epistemological and methodological perspectives to the research process Feminists approach to methodology allows for new types of questions about women s lives and those of other ed marginalized groups to be addressed within their respective fields of research This Handbook stresses the interconnections between epistemology methodology and methods They are not de linked from each other but work together in dynamic ways to produce new knowledge and this openness itself is also characteristic of how feminist researchers approach their work Feminists engage synergistically with all three aspects of the research process epistemology methodology and method Through a synergistic connection between these elements of research epistemology methodology and method we find that feminist research often shapes new research endeavors that are greater than the sum of their parts In other words while traditional research employs these components of research the synergistic engagement of these components in feminist research questions the status quo aiming to raise our consciousness about how we do research Looking at the selections provided in this Handbook we are able to look at feminist research its implementation of synergistic use of epistemology methodology and method and the resulting qualities of feminist research in practice
