Bjærke, Anne Eriksen**

## **Sixth Extinction:**

*The Sixth Extinction* Elizabeth Kolbert, 2014-01-01 Over the last half billion years there have been five major mass extinctions when the diversity of life on Earth suddenly and dramatically contracted Scientists are currently monitoring the sixth extinction predicted to be the most devastating since the asteroid impact that wiped out the dinosaurs This time around the cataclysm is us In this book the author tells us why and how human beings have altered life on the planet in a way no species has before She provides a moving account of the disappearances of various species occurring all around us and traces the evolution of extinction as concept from its first articulation by Georges Cuvier in revolutionary Paris up to Lyell and Darwin and through the present day The sixth extinction is likely to be mankind s most lasting legacy compelling us to rethink the fundamental question of what it means to be human Back cover [The Sixth Extinction](#) Elizabeth

Kolbert, 2014-02-01 Over the last half billion years there have been five major mass extinctions when the diversity of life on Earth suddenly and dramatically contracted Scientists are currently monitoring the sixth extinction predicted to be the most devastating since the asteroid impact that wiped out the dinosaurs This time around the cataclysm is us In this book the author tells us why and how human beings have altered life on the planet in a way no species has before She provides a moving account of the disappearances of various species occurring all around us and traces the evolution of extinction as concept from its first articulation by Georges Cuvier in revolutionary Paris up to Lyell and Darwin and through the present day The sixth extinction is likely to be mankind s most lasting legacy compelling us to rethink the fundamental question of what it means to be human *The 6th Extinction* Elizabeth Kolbert, 2015-01-06

WINNER OF THE PULITZER PRIZE ONE OF THE NEW YORK TIMES BOOK REVIEW S 10 BEST BOOKS OF THE YEAR A NEW YORK TIMES BESTSELLER A NATIONAL BOOK CRITICS CIRCLE AWARD FINALIST A major book about the future of the world blending intellectual and natural history and field reporting into a powerful account of the mass extinction unfolding before our eyes Over the last half billion years there have been Five mass extinctions when the diversity of life on earth suddenly and dramatically contracted Scientists around the world are currently monitoring the sixth extinction predicted to be the most devastating extinction event since the asteroid impact that wiped out the dinosaurs This time around the cataclysm is us In prose that is at once frank entertaining and deeply informed New Yorker writer Elizabeth Kolbert tells us why and how human beings have altered life on the planet in a way no species has before Interweaving research in half a dozen disciplines descriptions of the fascinating species that have already been lost and the history of extinction as a concept Kolbert provides a moving and comprehensive account of the disappearances occurring before our very eyes She shows that the sixth extinction is likely to be mankind s most lasting legacy compelling us to rethink the fundamental question of what it means to be human **The**

**Sixth Extinction (young Readers Adaptation)** Elizabeth Kolbert, 2026-02-03 In this young readers adaptation of the New York Times bestselling Pulitzer Prize winning *The Sixth Extinction* Elizabeth Kolbert tells us why and how human beings have

altered life on the planet in a way no species has before Over the last half billion years there have been five mass extinctions when the diversity of life on earth suddenly and dramatically contracted Scientists around the world are monitoring the sixth extinction predicted to be the most devastating extinction event since the asteroid impact that wiped out the dinosaurs

Adapting from her New York Times bestselling Pulitzer Prize winning adult nonfiction Elizabeth Kolbert explores how humans are altering life on Earth

**The Sixth Extinction** Instaread,2015-09-15 PLEASE NOTE This is key takeaways and analysis of the book and NOT the original book The Sixth Extinction by Elizabeth Kolbert Key Takeaways Analysis Review Preview The Sixth Extinction is a book by award winning journalist Elizabeth Kolbert In this book the author demonstrates that species are dying out at a rate comparable to the previous mass extinctions and if the trend of global warming deforestation and pollution continues in its present course the numbers of extinct species will meet or exceed that rate of destruction This event will include the extinction of humanity What this means is that the current loss of life today will soon justify the term The Sixth Extinction a mass extinction like the one that destroyed the dinosaurs 65 million years ago When humans originated about 100 000 years ago they began to hunt some species into extinction Their ability to outcompete other early hominids for food led to the extinction of those species including Neanderthals The extinction of species picked up steam when humans began transforming great swaths of forest and plains into farmland about 10 000 years ago

Inside this Instaread of The Sixth Extinction Overview of the book Important People Key Takeaways Analysis of Key Takeaways About the Author With Instaread you can get the key takeaways and analysis of a book in 15 minutes We read every chapter identify the key takeaways and analyze them for your convenience

**Sixth Extinction** Elizabeth Kolbert,2024 Over the last half billion years there have been five mass extinctions when the diversity of life on earth suddenly and dramatically contracted Scientists around the world are monitoring the sixth extinction predicted to be the most devastating extinction event since the asteroid impact that wiped out the dinosaurs

[Summary and Analysis of The Sixth Extinction: An Unnatural History](#) Worth Books,2017-02-14 So much to read so little time This brief overview of The Sixth Extinction tells you what you need to know before or after you read Elizabeth Kolbert s book Crafted and edited with care Worth Books set the standard for quality and give you the tools you need to be a well informed reader This short summary and analysis of The Sixth Extinction An Unnatural History by Elizabeth Kolbert includes Historical context Chapter by chapter overviews Detailed timeline of key events Important quotes Fascinating trivia Glossary of terms Supporting material to enhance your understanding of the original work

About The Sixth Extinction by Elizabeth Kolbert Our planet has endured five events of mass extinction from centuries of catastrophic heating and cooling to the asteroid that fell to earth and ended the Cretaceous Period We are currently facing the sixth extinction and this time the human species is to blame Elizabeth Kolbert travels the world and meets with scientists who are grappling with the ecological outcomes of human activity Her Pulitzer Prize winning modern science classic tells the stories of thirteen different species that have already disappeared or are on the brink of

extinction as a result of human activity A captivating blend of research and historical anecdotes enlightens readers about the unintentional consequences of our behaviors from climate change and global warming to invasive species and overexploitation The summary and analysis in this ebook are intended to complement your reading experience and bring you closer to a great work of nonfiction *The Sixth Extinction: by Elizabeth Kolbert | Key Takeaways, Analysis & Review* Instaread,2015-09-15 The Sixth Extinction by Elizabeth Kolbert Key Takeaways Analysis Review Preview The Sixth Extinction is a book by award winning journalist Elizabeth Kolbert In this book the author demonstrates that species are dying out at a rate comparable to the previous mass extinctions and if the trend of global warming deforestation and pollution continues in its present course the numbers of extinct species will meet or exceed that rate of destruction This event will include the extinction of humanity What this means is that the current loss of life today will soon justify the term The Sixth Extinction a mass extinction like the one that destroyed the dinosaurs 65 million years ago When humans originated about 100 000 years ago they began to hunt some species into extinction Their ability to outcompete other early hominids for food led to the extinction of those species including Neanderthals The extinction of species picked up steam when humans began transforming great swaths of forest and plains into farmland about 10 000 years ago PLEASE NOTE This is key takeaways and analysis of the book and NOT the original book Inside this Instaread of The Sixth Extinction Overview of the book Important People Key Takeaways Analysis of Key Takeaways **The Sixth Extinction: An Unnatural History... Summarized** J.J. Holt,2014-03-10 This is a summary of The Sixth Extinction An Unnatural History Summarized by J J Holt **The Sixth Extinction (10th Anniversary Edition)** Elizabeth Kolbert,2024-04-16 WINNER OF THE PULITZER PRIZE ONE OF THE NEW YORK TIMES BOOK REVIEW S 10 BEST BOOKS OF THE YEAR A NEW YORK TIMES BESTSELLER A NATIONAL BOOK CRITICS CIRCLE AWARD FINALIST The 10th anniversary edition of the instant classic The Sixth Extinction now with a new epilogue Kolbert blends intellectual and natural history and field reporting into a powerful account of the mass extinction unfolding before our eyes Over the last half a billion years there have been five mass extinctions when the diversity of life on earth suddenly and dramatically contracted Scientists around the world are currently monitoring the Sixth Extinction predicted to be the most devastating extinction event since the asteroid impact that wiped out the dinosaurs This time around the cataclysm is us In The Sixth Extinction two time winner of the National Magazine Award and New Yorker writer Elizabeth Kolbert draws on the work of scores of researchers in half a dozen disciplines accompanying many of them into the field geologists who study deep ocean cores botanists who follow the tree line as it climbs up the Andes marine biologists who dive off the Great Barrier Reef She introduces us to a dozen species some already gone others facing extinction including the Panamanian golden frog staghorn coral the great auk and the Sumatran rhino Through these stories Kolbert provides a moving account of the disappearances occurring all around us and traces the evolution of extinction as concept from its first articulation by Georges Cuvier in revolutionary Paris up through the present

day In the ten years since the book was originally published evidence of the Sixth Extinction has continued to mount making its message more urgent than ever The Sixth Extinction is likely to be mankind s most lasting legacy as Kolbert observes it compels us to rethink the fundamental question of what it means to be human

**Climate Change Temporalities** Kyrre Kverndokk, Marit Ruge Bjærke, Anne Eriksen, 2021-03-22 Climate Change Temporalities explores how various timescales timespans intervals rhythms cycles and changes in acceleration are at play in climate change discourses It argues that nuanced detailed and specific understandings and concepts are required to handle the challenges of a climatically changed world politically and socially as well as scientifically Rather than reflecting abstractly on theories of temporality this edited collection explores a variety of timescales and temporalities from narratives experience popular culture and everyday life in addition to science and history and the entanglements between them The chapters are clustered into three main sections exploring a range of genres such as questionnaires interviews magazines news media television series aquariums and popular science books to critically examine how and where climate change understandings are formed The book also includes chapters historicising notions of climate and temporality by exploring scientific debates and practices Climate Change Temporalities will be of great interest to students and scholars of humanistic climate change research environmental humanities studies of temporality and historicity cultural studies cultural history and popular culture

**The Sixth Extinction** Richard E. Leakey, Roger Lewin, 1995 Richard Leakey One Of The World s Foremost Experts On Man s Evolutionary Past Now Turns His Eye To The Future And Doesn t Like What He Sees To the philosophical the earth is eternal while the human race presumptive keeper of the world s history is a mere speck in the rich stream of life It is known that nothing upon Earth is forever geography climate and plant and animal life are all subject to radical change On five occasions in the past catastrophic natural events have caused mass extinctions on Earth But today humans stand alone in dubious distinction among Earth s species Homo Sapiens possesses the ability to destroy entire species at will to trigger the sixth extinction in the history of life In The Sixth Extinction Richard Leakey and Roger Lewin consider how the grand sprawl of human life is inexorably wreaking havoc around the world The authors of Origins and Origins Reconsidered unimpeachable authorities on the human fossil record turn their attention to the most uncharted anthropological territory of all the future and man s role in defining it According to Leakey and Lewin man and his surrounding species are end products of history and chance Now however humans have the unique opportunity to recognize their influence on the global ecosystem and consciously steer the outcome in order to avoid triggering an unimaginable upheaval

**Humans Versus Nature** Daniel R. Headrick, 2020 Since the appearance of Homo sapiens on the planet hundreds of thousands of years ago human beings have sought to exploit their environments extracting as many resources as their technological ingenuity has allowed As technologies have advanced in recent centuries that impulse has remained largely unchecked exponentially accelerating the human impact on the environment Humans versus Nature tells a history of the global environment from the Stone Age to the

present emphasizing the adversarial relationship between the human and natural worlds Nature is cast as an active protagonist rather than a mere backdrop or victim of human malfeasance Daniel R Headrick shows how environmental changes epidemics climate shocks and volcanic eruptions have molded human societies and cultures sometimes overwhelming them At the same time he traces the history of anthropogenic changes in the environment species extinctions global warming deforestation and resource depletion back to the age of hunters and gatherers and the first farmers and herders He shows how human interventions such as irrigation systems over fishing and the Industrial Revolution have in turn harmed the very societies that initiated them Throughout Headrick examines how human driven environmental changes are interwoven with larger global systems dramatically reshaping the complex relationship between people and the natural world In doing so he roots the current environmental crisis in the deep past *Guide to Elizabeth Kolbert's the Sixth Extinction* Elizabeth Kolbert,Eureka,2017-03-31 PLEASE NOTE THIS IS A GUIDE TO THE ORIGINAL BOOK *Guide to Elizabeth Kolbert's The Sixth Extinction Preview* The Sixth Extinction is a book by award winning journalist Elizabeth Kolbert In this book the author demonstrates that species are dying out at a rate comparable to the previous mass extinctions and if the trend of global warming deforestation and pollution continues in its present course the numbers of extinct species will meet or exceed that rate of destruction This event will include the extinction of humanity What this means is that the current loss of life today will soon justify the term The Sixth Extinction a mass extinction like the one that destroyed the dinosaurs 65 million years ago Inside this companion Overview of the book Important People Key Insights Analysis of Key Insights *The Sixth Extinction* Elizabeth Kolbert,Save Time Summaries,2014-03-11 WARNING This is not the actual book The Sixth Extinction by Elizabeth Kolbert Do not buy this Summary Review Analysis if you are looking for a full copy of this great book This summary of The Sixth Extinction drills deep down into the book which travels to exotic locations around the world to illustrate case studies of an endangered planet think of it as a 1000 places to see before the world dies In chapter synopses speculate on different scenarios that could lead to an earth altering cataclysm Visit a frozen zoo where the cells of a 1 000 species have been served a liquid nitrogen cocktail Find hope as you learn how the most important ecological experiment ever done is currently underway in the Amazon rainforest In addition to an author biography this summary of The Sixth Extinction includes a putting it together section a helping hand for understanding Kolbert's big ideas It's hard to believe that the sum total of all human civilization will one day be compressed into a rock layer the width of a piece of paper but in The Sixth Extinction Elizabeth Kolbert gives the reader an expansive overview of how Mother Earth is getting ready to clean house again This time it's not just the mastodon bones being thrown out with the trash An exploration of how humans are heading for mass extinction largely due to their own follies The Sixth Extinction compresses anecdotes evidence and scientific characters into a sometimes humorous tome of an otherwise serious topic **The Sixth Extinction** Terry Glavin,2007-04-03 A survey of the social extinctions taking place in the modern world draws on a variety of scientific disciplines to reveal how

advances in globalization are contributing to the losses of languages as well as diverse cultural ways of living seeing and understanding

**Science and Technology** Erica Duran, Lauren Mecucci Springer, 2019-08-06 Science and Technology explores questions around the central concepts of STEM fields How do we interact with science and technology on a daily basis Is technology surpassing biology What are the ethics of science and technology Does technology rule our economy How is the internet changing society Readings by biologists climate scientists journalists ethicists novelists engineers and others take up these questions and more Questions and assignments for each selection provide a range of activities for students The Bedford Spotlight Reader Series is an exciting line of single theme readers each reflecting Bedford's trademark care and quality An editorial board of a dozen compositionists at schools with courses focusing on specific themes assists in the development of the series Each reader collects thoughtfully chosen selections sufficient for an entire writing course about 35 pieces to allow instructors to provide carefully developed high quality instruction at an affordable price Bedford Spotlight Readers are designed to help students from all majors make sustained inquiries from multiple perspectives opening up topics such as borders food gender happiness humor language monsters music subcultures and sustainability to critical analysis The readers are flexibly arranged in thematic chapters with each chapter focusing in depth on a different facet of the central topic The instructor resource tab of each reader's catalog page includes instructor support with sample syllabi and additional teaching resources

**Geobulletin** Geological Society of South Africa, 2008 Quarterly news bulletin Kwartaallikse nuusbuletin

*The Sixth Extinction* Aurora Wynter, 2025-06-07 Earth has witnessed five cataclysmic mass extinction events that forever reshaped life on the planet Now a sixth extinction is unfolding one driven not by asteroids or supervolcanoes but by human activity In *The Sixth Extinction* Aurora Wynter presents a comprehensive and urgent exploration of both past and present die offs weaving together insights from paleontology climate science and ecology This meticulously researched book examines the fossil record of ancient extinctions the natural forces that once reset life on Earth and the alarming parallels to today's biodiversity crisis It traces the impact of habitat destruction pollution overexploitation invasive species and climate change revealing how human actions are accelerating species loss at an unprecedented rate Readers will explore case studies of critically endangered species the cascading consequences of ecosystem collapse and the role of global cooperation and innovative technologies in halting this crisis Wynter also offers a hopeful vision outlining actionable strategies to protect the planet's remaining biodiversity and foster resilience *The Sixth Extinction* is a vital wake up call for anyone concerned about the future of life on Earth and a compelling guide for those determined to make a difference

*The Sixth Extinction* Richard Leakey and Roger Lewin, 1995
