William H. Beamish,Scott R. McKinley,2004-10-18 Modern North American sturgeons and paddlefish are the result of 100 million years of evolution Once an integral part of aboriginal culture their numbers were decimated by overfishing and habitat destruction during the past two centuries This book details the extensive science aimed at helping these remarkable species recover from

the brink of extinction and describes the historical biological and ecological importance of North American sturgeon and paddlefish. The text is enhanced by photographs and detailed line drawings. This comprehensive volume will be an invaluable resource for researchers, educators, and consultants in academic and government settings who work to further scientific understanding of these fishes. No other single compilation has documented current information in such detail.
