## **Talking Health Conventional And Complementary Approaches:**

**Talking Health** Clive Wood, 1988 Can conventional medicine meet the needs of every patient Can current interest in complementary therapies be explained simply by communication problems between doctors and patients Have technological advances in modern medicine resulted in de personalization and is the modern hospice movement society's reaction Is complementary medicine scientific and is there any proof that it works Should complementary practitioners be included in multidisciplinary teams to provide whole person care Is there a role for Christian counselling How does the layman view the medical scene What are the implications of the present trend towards self health The Handbook of Alternative and Complementary Medicine Stephen Fulder, 1996 The Handbook of Complementary and Alternative Medicine is acknowledged to be the most authoritative and complete guide to complementary medicine available The result of extensive research it provides a detailed picture of the status of alternative and complementary medicine in the UK and internationally The Handbook examines the developing social position of complementary medicine including legal political scientific educational and demographic aspects and considers why people choose complementary therapies how many do so and what happens during and after their treatment For each therapy there is a concise review of the theoretical practical and research aspects written in collaboration with a leading practitioner and providing an authoritative introduction to the field The book also includes an invaluable resource guide covering all the significant colleges professional bodies and societies in this area of medicine and detailing over 250 organizations as well as an extensive glossary and bibliography This third edition has been extensively rewritten expanded and updated and reflects the dramatic increase in complementary medicine over the past years in the UK alone there are more complementary practitioners than general practitioners now It charts the growing level of interest among medical professionals and the general public the coverage of research has been extended new sections have been added dealing with the UK National Health Service and education The Handbook is an invaluable reference source for all medical practitioners including nurses researchers and administrators as well as members of the general public who want to make an informed choice about complementary medicine **Teratologies** Jackie Stacey, 2013-07-23 Stories of cancer are full of monster and marvels the monstrosity of the disease and the treatments the marvels of the cures and the saved lives Still one of the most dreaded diseases to haunt our imaginations cancer is more than an illness it is a cultural phenomenon People who have cancer are bombarded with competing explanations of their conditions it is genetically inherited it is environmentally produced it is the result of their personality Teratologies A Cultural Study of Cancer investigates how this disease is perceived experienced and theorised in contemporary society It explores changing beliefs about the causes of and the cures for cancer in both biomedicine and its increasingly popular alternative counterparts Analysing conventional and alternative medical accounts self help manuals and patients personal stories Jackie Stacey takes a critical look at the place of heroes metaphors the self and the body in these competing bids to produce the authoritative

definition of the meaning of cancer today Interspersed with these detailed textual investigations are discussions of broader issues such as the feminist debates about the history of science the place of consumer culture in health practices and the status of patients and of health professionals in postmodern society Combining autobiographical narratives with contemporary theoretical debates the author carves out a specifically feminist analysis of the cultural dimensions of cancer She brings accounts of her own illness under the critical lens of academic scrutiny and situates these personal stories within a discussion of contemporary cultural change
