Talking With Computers In Natural Language:

Talking with Computers in Natural Language Eduard V. Popov, 1986-08 Intended for a wide circle of specialists in automated systems Above all however it is intended for those who work on systems for communicating with machines

Talking with Computers in Natural Language Eduard V. Popov, 1986 The growing efficiency and lower prices of computers make it possible to apply them more widely in the economy However the wide use of computers in every day life is hindered by a number of factors which constitute what we shall call the problem of contact or of talking The difficulty is that languages used by computers differ substantially from users languages and are not understood by specialists who are unfamiliar with programming This is why those specialists who use computers need the help of programmers to communicate Since this form of communication has many more or less obvious shortcomings great efforts have been made to find a solution to the problem of contact Two approaches can be distinguished here 1 making the computer language similar to the natural language 2 making the user's language resemble that of computers through formalizing the former This book deals with the first approach We shall consider those systems which make it possible to talk with the user in limited natural language LNL The term natural language NL has been used in the title of this book instead of LNL The reason for not using the term limited natural language is that this term has two meanings 1 a dialect of a natural language 2 a formal language whose operators are expressed by words taken from a natural language e.g

Getting Computers to Talk Like You and Me Rachel Reichman, 1985 This book makes an important contribution to the study of pragmatics and discourse by presenting an explicit and precise computational approach to the complex problem of the structure of discourse Natural Language Input for a Computer Problem Solving System Daniel Gureasko Bobrow, 1964 The STUDENT problem solving system programmed in LISP accepts as input a comfortable but restricted subset of English which can express a wide variety of algebra story problems STUDENT finds the solution to a large class of these problems The thesis includes a summary of other English language question answering systems The linguistic analysis in STUDENT is a first approximation to the analytic portion of a semantic theory of discourse outlined in the thesis STUDENT finds the set of kernel sentences which are the base of the input discourse and transforms this sequence of kernel sentences into a set of simultaneous equations which form the semantic base of the STUDENT system STUDENT then tries to solve this set of equations for the values of requested unknowns If it is successful it gives the answers in English If not STUDENT asks the user for more information and indicates the nature of the desired information The STUDENT system is a first step toward natural language communication with computers Author [unreadable], 2005 21 *Python For Automations* satluciferan, 2025-12-02 Python for Automation Make Your Life Better You didn't pick up this book to learn another programming language You picked it up because your time matters If you've ever felt your focus chipped away by tiny thankless clicks if you've ever stayed late to wrestle a report you'll never read again if you've thought There has to be a better way you're in the right place This is a hands on field guide

to turning computers into coworkers It won't bury you in jargon It won't ask you to love theory It will help you reclaim your hours with small satisfying wins that add up fast By the end you won't just know Python you'll delegate to Python What this book does for you Gets you wins on Day One A simple setup a wow script and momentum that sticks Builds real confidence Variables loops functions files and SQLite only what you actually use explained like a friend at your desk Upgrades your everyday work Regex that finds and fixes patterns in seconds CSV JSON YAML pipelines that tame messy data Spreadsheet magic with pandas that turns numbers into clear shareable reports Takes you beyond the browser Scrape with requests BeautifulSoup Log in click and submit forms with Selenium bots you can literally watch working for you Delegates the follow up Automatic email reports Slack Discord alerts calendar syncs and a Daily Brief in your inbox every morning Lets your computer do the clicking Launch apps focus windows move the mouse type and capture screens with PyAutoGUI Yes it's as fun as it sounds Adds your voice Build a mini JARVIS that listens and executes commands hands free Scales when you're ready Scheduling async speedups cloud or Raspberry Pi deploys and one file apps with PyInstaller Delivers the payoff Automate personal finance and plug in AI to summarize draft and chat bots that think with you not just for you How the journey flows Part 1 Mindset ship a first win Part 2 Core Powers The essentials taught practically Part 3 Data Alchemy Text tricks tidy pipelines spreadsheet sorcery Part 4 The Web Frontier Scrape and drive real websites Part 5 Delegation Email chat calendar daily dashboards Part 6 Desktop Control OS windows UI media watchdogs Part 7 Voice NLP Your own voice controlled assistant Part 8 Scale Share Speed reliability deploys one file apps Parts 9 10 The Payoff Finance automation AI integration No gatekeeping No fluff Just clear steps copy and adapt snippets and projects that make your day lighter Open the book Ship your first automation Today is the day you stop clicking and start commanding **Talking Computer** Paresh P.
