[Thinking Through Television](#) Lorenz Engell, 2025-10-01 Media philosophy can only be found and revealed in media themselves The essays collected in this volume thus approach television as a medium both of thought and of action in its own right Through its specific forms and practices television implements and reflects on aspects of time such as synchronicity and succession seriality and event history and memory Additionally television stages new forms of thinking causality and agency subject object relations tactility choice and other founding concepts of everyday experience as well as of outstanding philosophical relevance In the course of media evolution television organizes the transition from the analogue to the digital Last not least by conceiving of itself television offers a source of finally thinking through television

[Thinking Through Poetry](#) Marjorie Levinson, 2018-07-04 Thinking through Poetry Field Reports on Romantic Lyric pursues two goals The title signals the contribution to debates about reading Do we think through by means of with poems sympathetically elaborating their surfaces Is this compatible with a second meaning thinking through poems to their end solving a problem getting to its root its deep truth Third can we square these surface and depth readings with a speculative philosophical criticism to which the poem carries us where through denotes a going beyond All three meanings of through are in play throughout The subtitle applies field first to Romantic studies since the 1980s a field that this project reflects upon from beginning to end Examples are drawn especially from Wordsworth but also from Coleridge and in assessing Romanticism's afterlife from Stevens Field also characterizes the shift from a unitary to a field concept of form during that time span a shift pursued through prolonged engagement with Spinoza Field thus underscores the synthesis of form and history the importance of analytic scale to that synthesis and the displacement of entity text by relation as the object of investigation While the book historically connects early nineteenth century intellectual trends to twentieth and twenty first century scientific revolutions its focuses on introducing new models to literary criticism Unlike accounts of the influence of science on literature or various literature X approaches literature and ecology literature and cognitive science it constructs its object of inquiry in a way cognate with work in non humanities disciplines thus highlighting a certain unity to human knowledge The claim is that specialists in literature should think the way distinguished scientists think and vice versa

The International Baccalaureate Diploma Program and the School Library Anthony

Tilke,2011-03-11 This book a blend of practice and theory shows how the school library can contribute to the success of the International Baccalaureate Diploma Program Written for librarians in schools that are applying to offer the program as well as those who already work with it The International Baccalaureate Diploma Program and the School Library Inquiry Based Education provides information and strategies specifically relating libraries to the IBDP The guide includes information about the IBDP ranging from the subject matrix to unique aspects of the program such as the Theory of Knowledge course the Extended Essay requirement and the Learner Profile The book also discusses other important features of IB programs such as internationalism and academic honesty Finally it blends theory and practice by providing details and findings from the only two year research study to follow students and teachers through the IBDP The study demonstrates the role of the school library in the program showing how both students and teachers used and valued it Each chapter concludes with a series of points or strategies for the librarian to reflect upon and or use as the basis of action

The Origin of Time Heath Massey,2015-02-23 The recent renewal of interest in the philosophy of Henri Bergson has increased both recognition of his influence on twentieth century philosophy and attention to his relationship to phenomenology Until now the question of Martin Heidegger s debt to Bergson has remained largely unanswered Heidegger s brief discussion of Bergson in Being and Time is geared toward explaining why he fails in his attempts to think more radically about time Despite this dismissal a close look at Heidegger s early works dealing with temporality reveals a sustained engagement with Bergson s thought In The Origin of Time Heath Massey evaluates Heidegger s critique of Bergson and examines how Bergson s efforts to rethink time in terms of duration anticipate Heidegger s own interpretation of temporality Massey demonstrates how Heidegger follows Bergson in seeking to uncover primordial time by disentangling temporality from spatiality how he associates Bergson with the tradition of philosophy that covers up this phenomenon and how he overlooks Bergson s ontological turn in Matter and Memory Through close readings of early major works by both thinkers Massey argues that Bergson is a much more radical thinker with respect to time than Heidegger allows
