## **Twin Planets:**

*Planets of the Known Galaxy* Kevin J. E. Walsh, 2024-11-15 This book offers a tour of the known galaxy here defined as the region of interstellar space closest to Earth The phrase the known galaxy has a particular resonance in science fiction as it refers to the part of the Milky Way that from the perspective of a point in time centuries from now may have been explored and settled by human beings In the known galaxy there are gloomy ocean worlds illuminated by the light of exploding stars There are worlds where precious gems could be as common as pebbles There are planets eternally wandering between the stars like the Flying Dutchman There are lava worlds steam worlds hot Jupiters cold Jupiters and maybe even worlds like our Earth The purpose of the book is to begin to give this region a sense of place in the same way that Mars is now starting to be appreciated as a location rather than just a planet In doing so the book merges our current scientific knowledge of the known galaxy with speculative fiction and with older legends and myths A sense of place is the feeling that some locations have a special meaning This emotional connection arises from a combination of cultural and environmental factors that make individuals care about a particular place It is challenging to create a sense of place for distant locations that no human has visited and for which our current knowledge is limited This book attempts to take a step in this direction by dividing the known galaxy into a number of clearly described distinct regions by providing scientific descriptions of the likely environmental conditions on the known planets of these regions and by linking these planets to their literary and mythological context The book is aimed at fans of both science fact and science fiction It combines a tour of real planets outside of our solar system with tales of their fictional counterparts The combination of solid scientific facts and analysis with speculation and imagination will be appealing to readers who want to gain a feeling for these planets as places with a back story rather than just as names somewhere out there in the sky

**SILVERDOME** Abba Shaib, 2012-03-07 The planet of C52 Solar is on the brink of self destruction another planetary victim to insatiable thirst for power greed and total disregard for fellow life forms Billions of lives are at stake and the answer may just lie within the great Silverdome of Rool Two young scientists set off from the galactic ruling planets of Vactron Their quest to acquire the crystal domes which carry the key to changing the fate of the doomed planet and their journey takes them to the deepest and most inhospitable of all the villain quadrants to the Devil's Stone where they find out that the keys come with a price a very heavy price

**APOCATASTASIS** Emil Lips, 2016-03-03 Strokes of genius come rarely in life This is one of those APOCATASTASIS is an extraordinary work In simple clear language Lips takes the reader to a deeper understanding of the planets their dignities and debilities and on to a world formula that brings order to chaos and that will change our world view The experienced teacher Heisenberg would only examine the work of his pupils when the result was simple and aesthetically beautiful The result presented by Lips is simple and beautiful His astrological research has enabled him to discover the law that thinkers of all cultures have been searching for since time immemorial The principles of his symmetrical theory are now seen to be inevitable not to be

confused with the Christian or Stoic meaning of this term is the astrological teaching of the eternal cycle of the celestial rulers planets and their rulership over all things and the zodiac signs
