Two Cultures Scientific Revolution:

The Two Cultures C. P. Snow, 1993-07-30 The notion that our society its education system and its intellectual life is characterised by a split between two cultures the arts or humanities on one hand and the sciences on the other has a long history But it was C P Snow s Rede lecture of 1959 that brought it to prominence and began a public debate that is still raging in the media today This 50th anniversary printing of *The Two Cultures* and its successor piece *A Second Look* in which Snow responded to the controversy four years later features an introduction by Stefan Collini charting the history and context of the debate its implications and its afterlife The importance of science and technology in policy run largely by non scientists the future for education and research and the problem of fragmentation threatening hopes for a common culture are just some of the subjects discussed *The Two Cultures and the Scientific Revolution* Charles Percy Snow, 1963

From Two Cultures to No Culture Frank Furedi, 2009 In 1959 C P Snow delivered the annual Rede Lecture in Cambridge under the title of *The Two Cultures and the Scientific Revolution* Snow warned of a gap that had opened up between scientists and the literary intellectuals that made it almost impossible for the two groups to communicate Snow complained that literary intellectuals were not only ignorant of science but contemptuous of it as if scientific knowledge were unnecessary for a good education Snow believed that improvements in the teaching of science were required in order to address the world s greatest problems and that both the USA and the USSR were ahead of Britain in that respect Snow spoke with the authority of a man with a foot in both camps as a trained research scientist and a successful novelist and his lecture provoked worldwide coverage *The Two Cultures and the Scientific Revolution* C. P. Snow, 2013-12 2013 Reprint of 1959 Edition Exact facsimile of the original edition not reproduced with Optical Recognition Software This is the publication of the influential 1959 Rede Lecture by British scientist and novelist C P Snow Its thesis was that the intellectual life of the whole of western society was split into the titular two cultures namely the sciences and the humanities and that this was a major hindrance to solving the world s problems Published in book form Snow s lecture was widely read and discussed on both sides of the Atlantic leading him to write a 1963 follow up *The Two Cultures And a Second Look An Expanded Version of The Two Cultures and the Scientific Revolution* **THE TWO CULTURES: AND A SECOND LOOK** C.P. SNOW, 1963

Science Fiction and the Two Cultures Gary Westfahl, George Slusser, 2009-06-01 Essays in this volume demonstrate how science fiction can serve as a bridge between the sciences and the humanities The essays show how early writers like Dante and Mary Shelley revealed a gradual shift toward a genuine understanding of science how H G Wells first showed the possibilities of combining scientific and humanistic perspectives how writers influenced by Gernsback s ideas like Isaac Asimov illustrated the ways that literature could interact with science and assist in its progress and how more recent writers offer critiques of science and its practitioners The Two Cultures and the Scientific Revolution Charles Percy Snow, 1959

The Two Cultures Charles Percy Snow, 1974 *Tropes and the Literary-Scientific Revolution* Michael Slater, 2024-04-02

Tropes and the Literary Scientific Revolution Forms of Proof argues that the rise of mechanical science in the seventeenth century had a profound impact on both language and literature To the extent that new ideas about things were accompanied by new attitudes toward words what we commonly regard as the scientific revolution inevitably bore literary dimensions as well Literary tropes and forms underwent tremendous reassessment in the seventeenth century and early modern science was shaped just as powerfully by contest over the place of literary figures from personification and metaphor to anamorphosis and allegory In their rejection of teleological explanations of natural motion for instance early modern philosophers often disputed the value of personification a figural projection of interiority onto what was becoming increasingly a mechanical world And allegory a dominant mode of literature from the late Middle Ages until well into the Renaissance became the vice of those times as Thomas Rymer described it in 1674 This book shows that its acute devaluation was possible only in conjunction with a distinctively modern physics Analyzing writings by Sidney Shakespeare Bacon Jonson Brahe Kepler Galileo Hobbes Descartes and more it asserts that the scientific revolution was a literary phenomenon just as the literary revolution was also a scientific one

The Two Cultures Charles Percy Snow,1981

Reconsideration of Science and Technology III Liu Dachun,Yang Huili,Fan Shanshan,2022-09-30 Drawing on debates from traditional and postmodern thoughts on science and technology the title builds a new theoretical framework to reconsider science and technology integrating the opposing viewpoints that either justify science or negate it As the third volume of a three volume set that proposes to reconsider science and technology and explores how the philosophy of science and technology responds to an ever changing world this final volume seeks to restore the cultural implications of science Across the six chapters the authors probe the prospect of a pluralistic scientific culture including discussions of diversified value choices the tension between reason and unreason other binary characteristics of scientific knowledge including objectivity and uniqueness universality and locality as well as the loss awakening and reconstruction of scientific culture The authors call for a transformation of scientific culture from a dominant culture to an affirmative one and envision a free and open world of science and technology The volume will appeal to scholars and students interested in the philosophy of science and technology the ideology of scientism and anti scientism modernism and postmodernism Marxist philosophy and topics related to scientific culture

C. P. Snow and the Struggle of Modernity John de la Mothe,2013-09-06 The condition of modernity springs from that tension between science and the humanities that had its roots in the Enlightenment but reached its full flowering with the rise of twentieth century technology It manifests itself most notably in the crisis of individuality that is generated by the nexus of science literature and politics one that challenges each of us to find a way of balancing our personal identities between our public and private selves in an otherwise estranging world This challenge which can only be expressed as the struggle of modernity perhaps finds no better expression than in C P Snow In his career as novelist scientist and civil servant C P Snow 1905 1980 attempted to bridge the disparate worlds of modern science and the humanities While

Snow is often regarded as a late Victorian liberal who has little to say about the modernist period in which he lived and wrote de la Mothe challenges this judgment reassessing Snow's place in twentieth century thought He argues that Snow's life and writings most notably his Strangers and Brothers sequence of novels and his provocative thesis in *The Two Cultures and the Scientific Revolution* reflect a persistent struggle with the nature of modernity They manifest Snow's belief that science and technology were at the center of modern life

Birkbeck Joanna Bourke, 2022 In 2023 Birkbeck University of London celebrates 200 years of educating working people in central London It was founded in 1923 as the London Mechanics Institution and from its inception was a pioneering and radical institution This history is animated by the conviction that Birkbeck is its people Their thoughts and ambitions hopes and dreams labour and laughter are what this book describes celebrates and occasionally laments It explores the history of education as well as the history of place politics radicalism class race gender disciplinarity theatre food leisure war and everyday encounters Most of all this book is about ideas What does it mean to be educated How have these meanings changed over time What makes Birkbeck students unique What does it mean to be fully human exploiting our faculties in order to become better people
