Urban Climate:

Urban climate informatics Ariane Middel, Benjamin Bechtel, Matthias Demuzere, Negin Nazarian, 2023-04-18 *Urban Climate Science for Planning Healthy Cities* Chao Ren, Glenn McGregor, 2022-01-01 This volume demonstrates how urban climate science can provide valuable information for planning healthy cities The book illustrates the idea of Science in Time Science in Place by providing worldwide case based urban climatic planning applications for a variety of regions and countries utilizing relevant climatic spatial planning experiences to address local climatic and environmental health issues Comprised of three major sections entitled The Rise of Mega cities and the Concept of Climate Resilience and Healthy Living Urban Climate Science in Action and Future Challenges and the Way Forward the book argues for the recognition of climate as a key element of healthy cities Topics covered include urban resilience in a climate context climate responsive planning and urban climate interventions to achieve healthy cities climate extremes public health impact urban climate related health risk information urban design and planning and governance and management of sustainable urban development The book will appeal to an international audience of practicing planners and designers public health and built environment professionals social scientists researchers in epidemiology climatology and biometeorology and international to city scale policy makers Chapter Manchester The Role of Urban Domestic Gardens in Climate Adaptation and Resilience is available open access under a Creative Commons Attribution 4.0 International License via link [springer.com](https://www.springer.com)

Urban Climate Change and Heat Islands Riccardo Paolini, Mattheos Santamouris, 2022-11-14 *Urban Climate Change and Heat Islands Characterization Impacts and Mitigation* serves as a go to reference for a foundational understanding of urban climate drivers and impacts Through the book's comprehensive chapters the authors help readers identify problems associated with urban climate change along with potential solutions Global case studies are included and presented in a way in which they become globally relevant to any urban or intra urban environment The authors call on their extensive experience to present and explore methodologies and approaches to quantifying urban heat mitigation measures in a clear manner focusing on heat islands urban overheating and effects on air quality Includes global case studies that demonstrate how to design and implement urban heat mitigation measures that are area specific and effective under both current climate and future conditions Provides an overview of urban parameterizations in models leading to an improved understating of intra urban climate variability drivers Assesses potential heat and air quality health impacts of excessive heat events and changes in local urban climates

The Urban Climate Helmut Erich Landsberg, 1981 The *Urban Climate* aims to summarize analytical studies directed toward physical understanding of the rural urban differences in the atmospheric boundary layer Attempts to quantify conditions have met with some success There is certainly a clear understanding of the physical relations that create the climatic differences of urbanized areas Although some of the earlier classical studies are cited here the emphasis is on the work done during the last decade and a half This volume comprises 11 chapters beginning with an introductory chapter

discussing the literature surrounding the topic its historical development and the problem of local climate modification The second chapter presents an assessment of the urban atmosphere on a synoptic and local scale and examines the observational procedures involved The following chapters then go on to discuss urban air composition urban energy fluxes the urban heat island the urban wind field models of urban temperature and wind fields moisture clouds and hydrometeors urban hydrology special aspects of urban climate and finally urban planning This book will be of interest to practitioners in the fields of meteorology urban planning and urban climatology

Urban Climate Politics Jeroen van der Heijden, Harriet Bulkeley, Chiara Certomà, 2019-05-09 Since the 1990s a burgeoning literature has emerged on the politics and governance of urban climate It is now evident that urban responses to climate change involve a diverse range of actors as well as forms of agency that cross traditional boundaries and which have diverse consequences for disempowering different social groups This book provides an overview of the forms of agency in urban climate politics discussing the friction and power dynamics between them Written by renowned scholars it critically assesses the advantages and limitations of increasing agency in urban climate governance In doing so it sheds critical new light on the existing literature advances the state of knowledge of urban climate governance and discusses ways to accelerate urban climate action With chapters building on case studies from across the world it is ideal for scholars and practitioners working in the area of urban climate politics and governance This is one of a series of publications associated with the Earth System Governance Project For more publications see www.cambridge.org/earth-system-governance

Sustainable Ho Chi Minh City: Climate Policies for Emerging Mega Cities Antje Katzschner, Michael Waibel, Dirk Schwede, Lutz Katzschner, Michael Schmidt, Harry Storch, 2015-12-01 As climate change and urban development are closely interlinked and often interact negatively this edited volume takes Ho Chi Minh City Hanoi Vietnam's first mega urban region as a case study to analyse its vulnerability to climate change and to suggest measures towards a more sustainable urban development The book offers an overview on land use planning regarding the aspects of urban flooding urban climate urban energy and urban mobility as well as spatial views from the angle of urban planning such as the metropolitan level the city the neighbourhood and building level It shows that to a significant degree measures dealing with climate change can be taken from the toolbox of sustainable urban development and reflects how institutional structures need to change to enhance chances for implementation given socio-cultural and economic constraints This is merged and integrated into a holistic perspective of planning recommendations supporting the municipal government to increase its adaptive capacity The authors are members of a German government funded research project on how to support Hanoi's municipal government to adapt to risks related to climate change

Designing High-Density Cities Edward Ng, 2010 Compact living is sustainable living High density cities can support closer amenities encourage reduced trip lengths and the use of public transport and therefore reduce transport energy costs and carbon emissions High density planning also helps to control the spread of urban suburbs into open lands improves efficiency in urban infrastructure and services and results in

environmental improvements that support higher quality of life in cities Encouraging even requiring higher density urban development is a major policy and a central principle of growth management programmes used by planners around the world However such density creates design challenges and problems A collection of experts in each of the related architectural and planning areas examines these environmental and social issues and argues that high density cities are a sustainable solution It will be essential reading for anyone with an interest in sustainable urban development

Urban Climates in Latin America Cristián Henríquez,Hugo Romero,2019-02-23 This book describes the observation of urban climates in Latin American and their relationships with urban sprawl the economic emergence of Latin American countries social segregation urban ecology disasters and resilience The chapters include contributions dealing with urban heat islands local climate zones thermal comfort air pollution extreme climate index green infrastructure health issues and adaptations based on the socio economic background of urban areas This book revises the role of urban planning and environmental governance highlighting the singularities in climate adaptation policies in developing countries

The Urban Heat Island Iain D. Stewart,Gerald Mills,2021-05-25 The Urban Heat Island UHI is an area of growing interest for many people studying the urban environment and local global climate change The UHI has been scientifically studied for 200 years and although it is an apparently simple phenomenon there is considerable confusion around the different types of UHI and their assessment The Urban Heat Island A Guidebook provides simple instructions for measuring and analysing the phenomenon as well as greater context for defining the UHI and the impacts it can have Readers will be empowered to work within a set of guidelines that enable direct comparison of UHI effects across diverse settings while informing a wide range of climate mitigation and adaptation programs to modify human behaviour and the built form This opens the door to true global assessments of local climate change in cities Urban planning and design strategies can then be evaluated for their effectiveness at mitigating these changes Covers both on surface and near surface or canopy measurements and impacts of Urban Heat Islands UHI Provides a set of best practices and guidelines for UHI observation and analysis Includes both conceptual overviews and practical instructions for a wide range of uses

Architecture, City, Environment Koen Steemers,Simos Yannas,2000 PLEA is a network of individuals sharing expertise in the arts sciences planning and design of the built environment It serves as an international interdisciplinary forum to promote discourse on environmental quality in architecture and planning This 17th PLEA international conference addresses sustainable design with respect to architecture city and environment at the turn of the millennium The central aim of the conference is to explore the interrelationships and integration of architecture city and environment The Proceedings will be of interest to all those involved in bioclimatic design and the application of natural and innovative techniques to architecture and planning The conference is organised by the Martin Centre for Architectural and Urban Studies University of Cambridge and the Cambridge Programme for Industry University of Cambridge

Urban Climates T. R. Oke,G. Mills,A. Christen,J. A. Voogt,2017-09-14 Urban Climates is the

first full synthesis of modern scientific and applied research on urban climates The book begins with an outline of what constitutes an urban ecosystem It develops a comprehensive terminology for the subject using scale and surface classification as key constructs It explains the physical principles governing the creation of distinct urban climates such as airflow around buildings the heat island precipitation modification and air pollution and it then illustrates how this knowledge can be applied to moderate the undesirable consequences of urban development and help create more sustainable and resilient cities With urban climate science now a fully fledged field this timely book fulfills the need to bring together the disparate parts of climate research on cities into a coherent framework It is an ideal resource for students and researchers in fields such as climatology urban hydrology air quality environmental engineering and urban design

Urban Climate

Justice Jennifer L. Rice, Joshua Long, Anthony Levenda, 2023-05-01 Arguing that climate injustice is one of our most pressing urban problems this volume explores the possibilities and challenges for more just urban futures under climate change Whether the situation be displacement within cities through carbon gentrification or the increasing securitization of elite spaces for climate protection climate justice and urban justice are intimately connected Contributors to the volume build theoretical tools for interrogating the root causes of climate change as well as policy failures They also highlight knowledge produced within communities already seeking transformative change and demonstrate meaningful learning from activist groups working to address the socio-natural injustices caused by the impact of climate change The editors introduction situates our current climate emergency within historical processes of colonization racial capitalism and heteropatriarchy while the editors conclusion offers pathways forward through abolition care and reparations Where other books focus on the project of critique this collection advances real world politics to help academics practitioners and social justice groups imagine create and enact more just urban futures under climate change
