Urban Bus Transit A Planning Guide Waterloo:

Urban Bus Transit ; a Planning Guide John H. Shortreed, Ontario. Ministry of Transportation and Communications, 1974

Urban Transport Planning John Black, 2018-05-30 Originally published in 1981 Urban Transport Planning explains how the systems approach has been applied in the planning of multi modal transport planning and to demonstrate how a city may be represented by land use zones superimposed with a transport network It discusses theoretical developments and demonstrates their application to practical problems of planning by using actual case studies By treating the urban area as a system and recognising the fundamental interactions between land use traffic and transport the study shows how it is possible to predict the future demands for travel how transport requirements are determined and how alternative plans are formulated and evaluated

Urban Transportation Financing Mark w. Frankena, 1982-12-15 This is an economic analysis of pricing and subsidy policies for urban roads and urban public transit in Ontario Professor Frankena demonstrates the benefits of evaluating the economic merits of policy alternatives and attempts to determine whether existing policies waste resources or lead to undesirable income transfers among different groups in the population He concludes that resources are being wasted because the use of urban roads is substantially underpriced during periods of peak demand He also finds that while there are sound economic justifications for substantial public transit subsidies the allocation of subsidies by the Ontario government on the basis of capital expenditures can be expected to waste resources as can the maximization of ridership which is likely to lead to detrimental fare and service policies In conclusion Frankena suggests improvements in the systems for charging people for the use of roads and public transit and in the ways that governments provide subsidies
