**Democratic Republic of the Congo** International Monetary Fund. Monetary and Capital Markets Department,2014-10-22 This Financial System Stability Assessment on the Democratic Republic of the Congo highlights that the Congolese financial sector has recovered from the crisis of 2009 but is at a crossroads Although reforms have been initiated the system remains shallow highly dollarized and characterized by balance sheet fragilities The authorities have announced a de dollarization process however greater progress on reforms to strengthen the financial system is needed to support financial deepening and economic growth The team s analysis suggests that the financial system remains vulnerable Resilience to shocks is undermined by the lack of risk based supervision lax regulation and weak enforcement of existing regulations low profitability and an excessive reliance on sight deposits Steps are also needed to improve the capacity for micro and macroprudential supervision The implementation of risk based supervision for individual banks is a critical prerequisite for effective crisis prevention Assessments of bank specific and systemic soundness are severely handicapped by weak supervisory data and other information gaps There are significant weaknesses in accounting and auditing practices and even if indicators suggest high capitalization levels a more detailed analysis suggests banks are under provisioned partly owing to lax definitions of nonperforming loans and provisioning rules *Making Remittances Work* Emiko Todoroki,Wameek Noor,Kuntay Celik,Anoma Kulathunga,2014-06 Migrant workers routinely send small sums back to their families often a crucial lifeline for their survival But sending money across countries for these low income people is not easy and often very expensive and risky Better regulation and supervision of these payment channels can make the process easier to access and more secure **Coastal, Estuarial and Harbour Engineer's Reference Book** Michael B Abbott,W. Alan Price,1993-11-11 A major new reference book bringing together wide ranging expert guidance on coastal engineering including harbours and estuaries It covers both traditional engineering topics and the fast developing areas of mathematical modelling and computer simulation *Architectural Design Procedures* Arthur Thompson,2012-12-06 This book explains how architects obtain and administer work from the moment the contract is signed to the handing over of the finished building to the client and is an indispensable guide to all architecture students This second edition has been thoroughly updated and expanded It now includes significant additions to the section on design constraints a new section on quality assurance and management and information on new acts and regulations introduced since the publication of the first edition Other sections on subjects such as the Building Regulations use of computers and standard forms and letters have been brought up to date *Preventing Money Laundering and Terrorist Financing* ,2009 Money laundering and terrorist

financing are serious crimes that affect not only those persons directly involved but the economy as a whole According to international standards every bank has the obligation to know its customers and to report suspicious transactions Although these obligations sound straightforward they have proved challenging to implement What information precisely has to be gathered How should it be recorded If and when does one have to file a suspicious transaction report It is here that a supervisor can play a crucial role in helping supervised institutions first in understanding the full extent of the obligations of Customer Due Diligence and Suspicious Transaction Reports STR and second in ensuring that those obligations are not just words on paper but are applied in practice Effective supervision is key to the success of a country s AML CFT system In this regard field work in both developed and developing countries has shown an overall low compliance in the area of supervision of banks and other financial institutions supervisory compliance is indeed generally lower than the average level of compliance with all Financial Action Task Force recommendations As a result by providing examples of good practices this book aims to help countries better conform to international standards In this regard this handbook is specifically designed for bank supervisors
