## **The Space Age:**

**This New Ocean** William E. Burrows, 1999-11-05 It was all part of man's greatest adventure landing men on the Moon and sending a rover to Mars finally seeing the edge of the universe and the birth of stars and launching planetary explorers across the solar system to Neptune and beyond The ancient dream of breaking gravity's hold and taking to space became a reality only because of the intense cold war rivalry between the superpowers with towering geniuses like Wernher von Braun and Sergei Korolyov shelving dreams of space travel and instead developing rockets for ballistic missiles and space spectacles Now that Russian archives are open and thousands of formerly top secret U S documents are declassified an often startling new picture of the space age emerges the frantic effort by the Soviet Union to beat the United States to the Moon was doomed from the beginning by gross inefficiency and by infighting so treacherous that Winston Churchill likened it to dogs fighting under a carpet there was more than science behind the United States suggestion that satellites be launched during the International Geophysical Year and in one crucial respect Sputnik was a godsend to Washington the hundred odd German V 2s that provided the vital start to the U S missile and space programs legally belonged to the Soviet Union and were spirited to the United States in a derring do operation worthy of a spy thriller despite NASA's claim that it was a civilian agency it had an intimate relationship with the military at the outset and still does a distinction the Soviet Union never pretended to make constant efforts to portray astronauts and cosmonauts as Boy Scouts were often contradicted by reality the Apollo missions to the Moon may have been an unexcelled political triumph and feat of exploration but they also created a headache for the space agency that lingers to this day This New Ocean is based on 175 interviews with Russian and American scientists and engineers on archival documents including formerly top secret National Intelligence Estimates and spy satellite pictures and on nearly three decades of reporting The impressive result is this fascinating story the first comprehensive account of the space age Here are the strategists and war planners engineers and scientists politicians and industrialists astronauts and cosmonauts science fiction writers and journalists and plain ordinary unabashed dreamers who wanted to transcend gravity's shackles for the ultimate ride The story is written from the perspective of a witness who was present at the beginning and who has seen the conclusion of the first space age and the start of the second [Guide to the space age](#) C. W. Besserer, 1959 *Remembering the Space Age* Steven J. Dick, 2008 From the Publisher Proceedings of October 2007 conference sponsored by the NASA History Division and the National Air and Space Museum to commemorate the 50th anniversary of the Sputnik 1 launch in October 1957 and the dawn of the space age **Dawn of the Space Age** Robin Kerrod, 2004-07-04 Introduces the early history of space flight including the Chinese invention of the rocket the pioneering ideas of Tsiolkovsky the early experiments of Goddard and various rocket and satellite launchings up through 1967 **The Long Space Age** Alexander MacDonald, 2017-04-25 An economic historian traces uncovers the story of privately funded space exploration from early 19th century astronomical observatories to SpaceX The standard historical

narrative of American space exploration begins during the Cold War with the federal government's efforts to beat the Soviet Union in the Space Race. Given this framing, the more recent emergence of private sector space exploration appears to be a new and controversial phenomenon. But as Alexander MacDonald argues in *The Long Space Age*, privately funded space exploration had been happening in the United States long before we tried to put a man on the moon. Since the early 19th century, private observatories had been making discoveries and developing technologies that led directly to NASA's epochal 20th century achievements. And their efforts were no less ambitious for their time than SpaceX and Blue Origin are in today's resurgent space industry. *The Long Space Age* examines the economic history of this centuries-long development from those first American observatories to the International Space Station. *The Heavens and the Earth* Walter A. McDougall, 1997-10-24 McDougall covers the first twenty-five years of space travel from Sputnik to the Pioneer 10, including the industry, surrounding space exploration, political machinations relevant to the Cold War, and social effects from an age where the heavens were transformed into outer space. *The New Space Age #3* Kenny Porter, 2026-02-25 Mark Stacey and Bobby Pool pool their resources and create a craft the likes of which the world has never seen. After weeks of building, testing, and flying, the gang finally has a workable spacecraft that operates on magic and engineering. But as the space flight test approaches, Stacey starts to worry that Mark is pushing himself too hard. When the time to leave the atmosphere finally arrives, Mark is given the chance to follow his brother's signal and finally discover what happened to him. Can Mark avoid the temptation? Or will he push his prototype to its limits. Remembering the Space Age Steven Dick, 2009-11-18 This volume is nearly 500 pages and topics covered include Gigantic Follies, Human Exploration and the Space Age in Long-term Historical Perspective, National Aspirations on a Global Stage, Fifty Years of Spaceflight, Building Space Capability through European Regional Collaboration, Imagining an Aerospace Agency in the Atomic Age, Creating a Memory of the German Rocket Program for the Cold War Operation Paperclip in Huntsville, Alabama, The Great Leap Upward, China's Human Spaceflight Program and Chinese National Identity, The Right Stuff, The Reagan Revolution and the U.S. Space Program, Great Unfulfilled Expectations, To Boldly Go Where No Social Scientist and Historian Have Gone Before, Far Out: The Space Age in American Culture, A Second Nature, Rising Spaceflight in an Era of Representation, Creating Memories, Myth, Identity, and Culture in the Russian Space Age, The Music of Memory and Forgetting, Global Echoes of Sputnik 2, From the Cradle to the Grave, Cosmonaut Nostalgia in Soviet and Post-Soviet Film, Discovering the Iconic in Space Exploration Photography, Robert A. As television news anchors, radio hosts, and journalists reported the happenings of the American and the Soviet space programs to millions of

captivated citizens words that belonged to the worlds of science aviation and science fiction suddenly became part of the colloquial language What s more NASA used a litany of acronyms in much of its official correspondence in an effort to transmit as much information in as little time as possible To translate this peculiar vocabulary Paul Dickson has compiled the curious lingo and mystifying acronyms of NASA in an accessible dictionary of the names words and phrases of the Space Age This dictionary captures a broader foundation for the language of the Space Age based on the historical principles employed by the Oxford English Dictionary and Webster s Third New International Dictionary Word histories for major terms are detailed in a conversational tone and technical terms are deciphered for the interested student and lay reader This is a must own reference for space history buffs Book Jacket *The Next Space Age* Christopher Mari,2008 The book is divided into six chapters The first section Project Constellation NASA s Vision for Space Exploration focuses on the National Aeronautics and Space Administration NASA s plans to bring Americans out of low Earth orbit and back to the Moon where the space agency hopes to establish a permanent lunar colony as part of its long term preparations to conduct a manned exploration of Mars In the second chapter A New Space Race The Rise of China s Space Program selections provide an overview of China s space program including information about its Shenzhou space capsules and Long March rockets as well as articles that debate the impact the Chinese program will have on its American counterpart The issue of privately funded spaceflight is addressed in Commercializing the Cosmos Private Industry in Outer Space which brings together articles that describe the many private space ventures that have sprung up in recent years The fourth section Roving the Red Planet The Continuing Exploration of Mars assembles articles that provide historical context to the ongoing robotic exploration of the red planet as well as information on what these missions have uncovered thus far Robotic exploration is also examined in Sailing Through the Solar System A Look at Unmanned Probes in which selected entries detail how probes work recall famously successful probes like the Pioneer and Voyager series and compare the various probes currently tooling about our solar system Articles in the final section Exoplanets The Search for Extrasolar Earths discuss the efforts by astronomers to find a planet similar to Earth that might harbor extraterrestrial life Book Preface *The Omni Space Almanac* Neil McAleer,1987 Articles deal with the history of space exploration the shuttle program space stations life in space space disasters international space programs spaceships and the colonization of space **The New Space Age #4** Kenny Porter,2026-03-25 After a crushing blow from the U S Government Mark and Stacey are shaken to their core But as Mark tries to put the pieces of his deep space rescue mission back together Bobby s betrayal leads to a horrifying new discovery a drone version of their ship armed to the teeth and ready to kill *From the Stone Age to the Space Age* Philip Brooks,Will Fowler,Simon Adams,2003 From the first steps towards civilization among prehistoric peoples this visual encyclopedia moves on to explore the early societies of Europe Asia Africa and the Americas and their history making achievements such as the invention of writing [The Wind from the Sun](#) Arthur Charles Clarke,1972 The food of the gods Maelstrom II The shining ones The wind from the sun The secret The last

**The Unconstructable Earth** Frédéric Neyrat,2018-10-16 Winner Grand Prize French Voices Award for Excellence in Publication and Translation The Space Age is over Not at all A new planet has appeared Earth In the age of the Anthropocene the Earth is a post natural planet that can be remade at will controlled and managed thanks to the prowess of geoengineering This new imaginary is also accompanied by a new kind of power geopower that takes the entire Earth in its social biological and geophysical dimensions as an object of knowledge intervention and governmentality In short our rising awareness that we have destroyed our planet has simultaneously provided us not with remorse or resolve but with a new fantasy that the Anthropocene delivers an opportunity to remake our terrestrial environment thanks to the power of technology Such is the position we find ourselves in when proposals for reengineering the earth s ecosystems and geosystems are taken as the only politically feasible answer to ecological catastrophe Yet far from being merely the fruit of geo capitalism this new grand narrative of geopower has also been activated by theorists of the constructivist turn ecomodernist postenvironmentalist accelerationist who have likewise called into question the great divide between nature and culture With the collapse of this divide a cyborg hybrid flexible nature has been built an impoverished nature that does not exist without being performed by technologies that proliferate within the space of human needs and capitalist imperatives Underneath this performative vision resides a hidden anaturalism denying all otherness to nature and the Earth no longer by externalizing it as a thing to be dominated but by radically internalizing it as something to be digested Constructivist ecology thus finds itself in no position to confront the geoconstructivist project with its claim that there is no nature and its aim to replace Earth with Earth 2 0 Against both positions Neyrat stakes out the importance of the unconstructable Earth Against the fusional myth of technology over nature but without returning to the division between nature and culture he proposes an ecology of separation that acknowledges the wild subtractive capacity of nature Against the capitalist technocratic delusion of earth as a constructible object but equally against an organicism marked by unacknowledged traces of racism and sexism Neyrat shows what it means to appreciate Earth as an unsubstitutable becoming a traject that cannot be replicated in a laboratory Underway for billions of years withdrawing into the most distant past and the most inaccessible future Earth escapes the hubris of all who would remake and master it This remarkable book which will be of interest to those across the humanities natural sciences and social sciences from theorists to shapers of policy recasts the earth as a singular trajectory that invites humans to turn political ecology into a geopolitics
