Preston,2001-02-05 It is a cliché but this book is timely welcome and indeed a breath of fresh air It is of particular value
for people concerned with public communications political economy economics and the relationship between society and
technology Moreover this book powerfully dispels the tacit assumption prevalent in business politics media and academia
that a combination of technical fixes and the free market can right all social problems Irish Journal of Sociology Thirty years
ago one writer complained that to admire technology is all out of fashion Today excited claims are made for the impact that
these technologies are having on social political and economic life But how are we to assess these claims This book critically
interrogates many of the prevailing ideas offers a fresh perspective on this new digital age Reshaping Communications
Provides an alternative and more grounded account of the complex interplay between new technology and information
structures and changes in society Illuminates the fundamental continuities as well as changes in socioeconomic and political
processes Draws on an interdisciplinary perspective and original empirical research The book will be essential reading for all
those concerned with the new communication technologies including students of media and communications as well as policy

Evaluating Welfare Reform in an Era of Transition is a collection of papers on data collection issues for welfare and low income populations. The papers on survey issues cover methods for designing surveys taking into account nonresponse in advance, obtaining high response rates in telephone surveys, obtaining high response rates in in person surveys, the effects of incentive payments, methods for adjusting for missing data in surveys of low income populations, and measurement error issues in surveys with a special focus on recall error. The papers on administrative data cover the issues of matching and cleaning, access and confidentiality problems in measuring employment and income, and the availability of data on children. The papers on welfare leavers and welfare dynamics cover a comparison of existing welfare leaver studies, data from the state of Wisconsin on welfare leavers, and data from the National Longitudinal Survey of Youth used to construct measures of heterogeneity in the welfare population based on the recipient's own welfare experience. A final paper discusses qualitative data.
