Two Souls:

Self, Soul and Body in Religious Experience Albert I. Baumgartner, 2018-11-13 The papers in this volume were delivered at the first international colloquium by the Jacob Taubes Minerva Center for Religious Anthropology at Bar Ilan University held in February 1995 Concepts of Self Soul and Body are so close to the physiological layers of life that we may imagine them to be biological as well but in fact they are social constructs and a source of fundamental metaphors for the classification of experience They thus help organize the world at the same time as they express basic human identity They vary from culture to culture and can productively be compared and contrasted from one setting to another We intend these papers to be a test case of the benefit to be gained from attention to Religious Anthropology *Become Like the Angels* Benjamin P. Blosser, 2012-10-09 An ambitious and very well researched book on the way in which Origen deals with a fundamental issue in ancient philosophy the position state and function of the soul in a living being It is a topic at the core of all anthropological and cosmological thinking in Late Antiquity In elegant lucid prose Blosser takes the reader gently through the minefield of previous scholarship and presents a very clear and skillful exposition of Origen as religious philosopher John A McGuckin Professor of Byzantine Church History Columbia University and Editor of *The Westminster Handbook to Origen of Alexandria* Book Jacket **Dynamics of Monotheism in Late Antiquity** Guy G. Stroumsa, 2025-07-08 From early Christianity to the emergence of Islam the long late antiquity denotes a truly revolutionary period in the history of religions In many ways religious ritual patterns and theological worldviews were then radically transformed throughout the Near East and the Mediterranean In particular the traditional polytheistic systems collapsed giving way to various forms of monotheism and dualism In *Dynamics of Monotheism in Late Antiquity* Guy G Stroumsa seeks to analyze this multifaceted revolution as a whole rather than focusing as is usually the case on distinct religious communities and traditions such as Judaism Zoroastrianism Gnosticism Christianity Manichaeism and earliest Islam Many of the elements of religious change in our period can be perceived as a *praeparatio coranica* as it were as they set the scene for the advent of Islam The thrust of the book is to identify the key dynamics through which religious change happened in the kaleidoscope of religious conceptions The analysis emphasizes the dialectics between monotheist and dualist perceptions and systems It will also seek to identify the core elements of the Abrahamic religions in the making **Dickens and Victorian Psychology** Tyson Stolte, 2022 A study of the fiction of Charles Dickens that traces the intersections between nineteenth century literature and Victorian psychology and theories of the mind **The Philosophical Works of John Locke** John Locke, James Augustus St. John, 1903 **The Latter-Day Saints' Millennial Star**, 1915 *The Adventures of Zeloide and Amanzarifdine* M. de Moncrief, 1929 **The Gayworthys, by the author of 'Faith Gartney's girlhood'.
