Magazine, 1996-09-16 New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country With award winning writing and photography covering everything from politics and food to theater and fashion the magazine's consistent mission has been to reflect back to its audience the energy and excitement of the city itself while celebrating New York as both a place and an idea **Capital and Credit** Michio Morishima, 1994-03-25 Contemporary general equilibrium theory is characteristically short run separated from monetary aspects of the economy and as such does not deal with long run problems such as capital accumulation innovation and the historical movement of the economy These phenomena are discussed by growth theory which assumes a given or shifting production function and in turn cannot therefore deal with the fundamental problem of growth namely how the production function is derived Thus traditional theories have a common weakness in that they divorce real economic growth from the activities of the financial sector This book provides a much needed synthesis of growth theory and monetary theory Professor Morishima draws on the work of Schumpeter Keynes and the pre war neoclassical economists to formulate a capital theoretic general equilibrium theory *Science Friction* Michael
